EXTRACTION STIPULATION

To prevent potential material injury to senior water or geothermal rights under Colorado state law, and to ensure that existing geothermal features are protected under the terms of BLM's applicable Resource Management Plan, as amended by the Record of Decision and Resource Management Plan Amendments for Geothermal Leasing in the Western United States, 2008, as appropriate, this lease is restricted as follows:

Monitoring by the lessee prior to and during all lease operations, including development and utilization of a geothermal resource may be required as directed by the BLM in consultation with the Colorado State Engineer's Office, and the burden of proof shall be on the lessee, to ensure compliance with federal and state statutes, rules, and regulations.

Material injury may be determined by the relevant Colorado Water Court, and such an order from the Water Court may result in limitations on the use of the resource.
