Total Current Sales			1680	10428	12975	941.0	739.0	

RMP Proposed Plan

- 93,900 acres of forest and woodlands in the KFO
- 28,100 Net Acres have been identified as meeting the parameters for active intensive timber management.
- There are also some projects within the field office that are being harvested that are not identified in the RMP as intensive management areas because they don't meet all of the criteria for intensive management by definition.
- Some of the projects are done because of partnerships with other agencies and private parties.

Reed Creek

215 Acres, about 2.1 million board feet

Reed Creek Cont.

BLM foresters standing in front of logs decked and ready to be sent to mills around Colorado. Logs will be processed into boards, firewood, posts and poles and other specialty products.

A treatment unit where hazard tree threatening a power line will be removed. The unit was designed to incorporate a power line corridor, road corridor and reduce hazardous fuels near a communication site.
