I would like to protest the sale of oil and gas rights in the two 40 acre parcels in Pentwater Township. I see no positive outcomes from this endeavor. There can only be negative consequences to the environment, the native wildlife, both endangered and otherwise, the disruption to our way of life in our township and my subdivision of Duna Vista Resorts and thus the property values here.

I especially disagree with the practice of burying the waste water. Just because it is buried deep in the ground doesn't mean that it won't be a problem in the future. It also removes significant quantities of water from the natural water cycle. Water is to be used over and over through the centuries and not used for one greedy purpose only and thrown away.

Seems to me that the amount of oil and gas that would be gathered does not offset the danger to our environment here on beautiful Lake Michigan. Find somewhere else to produce energy. Keep Lake Michigan pure of pollution!
