Kemba Anderson

It has just come to our attention that we could comment on this BLM Oil and Gas Environmental Assessment. We have been on vacation and realize this is a couple of days late. I will be brief but hope you will review this.

We live adjacent to the Noffke property involved. Our concerns are:

1. The proximity to Lake Michigan (less than 3/4 of a mile). The fresh water supply for citizens of many states and Canada.
2. The use of 10 millions gallons of fresh water used over the life of a well; never to be recycled for any use.
3. The diminishing and or polluting of our well water.
4. How can this process be considered in a Michigan Critical Dune Area with all the stringent rules placed on homeowners.

Thanks for listening,

Judy and Gene Jankowski
