LAND STATUS

-  Bureau of Land Management
-  BLM Wilderness (ID)
-  BLM Wilderness Study Area (OR)
-  Private Land
-  State Land
-  Bureau of Reclamation
-  Military Reservation
-  Indian Reservation

SCALE 1 : 48,000

Contour Interval = 100 feet

Coordinate System: Projection - UTM Zone 11, Datum NAD 1927, units in meters

Source Information: Land status, hydrology, and transportation data compiled from Bureau of Land Management (BLM) resource base data at a scale of 1:24,000. Contours derived from scanned US Geological Survey 1:24,000 contour bases. The official land records should be checked for up-to-date status on any specific tract of land. Recreation information: BLM Boise, Twin Falls, Vale and Elko District Offices.

WARNING: Inclement weather can make road surfaces impassable. Travel on unpaved routes with properly equipped vehicles and in good weather. This is an extremely remote region. Plan ahead. Take precautions. Patrols are infrequent. Some roads cross private land and may require permission for access.

Even though every effort is made to depict the road network, features and descriptions accurately, BLM cannot guarantee road classification and/or positional accuracy of roads and other features in all cases. No warranty is made by the BLM for use of this data for purposes not intended by the BLM.

Flow

 Portaging is required in low to medium water in this section of rapids.

Canyon Geology - About 10 million years ago, the canyonlands consisted of rolling lava flows with rivers on the surface. Over time, the water carved through the basalt and rhyolite to form cliffs that now range from 200 to over 1,000 feet in height.
