

CONTROLLED SURFACE USE STIPULATION

NON-BOULDER BATHOLITH AND BOULDER BATHOLITH SOILS

Surface occupancy or use is subject to the following special operating constraints:

Prior to surface disturbance on areas of active mass wasting, unstable land areas, or slopes greater than 30 percent on non-Boulder Batholith soils or 20 percent on Boulder Batholith soils, an engineering/reclamation plan must be approved by the authorized officer. Such plan must demonstrate how the following will be accomplished:

- site productivity will be restored.
- surface runoff will be adequately controlled.
- off-site areas will be protected from accelerated soil erosion.
- surface disturbing activities will not be conducted during wet periods.

On the lands described below:

For the purpose of:

To maintain soil productivity and provide necessary protection to prevent excessive soil erosion on steep slopes.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes.

Exception: An exception may be granted if the operator can demonstrate in a plan of operations that adverse effects can be minimized and activities safely conducted.

Modification: The area affected by this stipulation may be modified by the authorized officer if it is determined that portions of the area do not include slopes over 30 percent on non-Boulder Batholith soils or 20 percent on Boulder Batholith soils, or the operator can demonstrate in a plan of operations that adverse effects can be minimized.

Waiver: This stipulation may be waived by the authorized officer if it is determined that none of the leasehold contains slopes greater than 30 percent on non-Boulder Batholith soils or 20 percent on Boulder Batholith soils.
