

CORPS OF ENGINEERS

INFORMATION NOTICE

- No surface occupancy for that portion of the lease area subject to inundation, lying below contour elevation 1855 feet msl (mean sea level).
- No surface occupancy within 300 feet of six identified archaeological sites within the lease area. All activities must be coordinated with the Corps of engineers Archaeologist located at the Garrison Dam/Lake Sakakawea Project Office.
- In the event that directional drilling is contemplated, all facilities constructed on project lands, which can be damaged by flood water and which cannot be readily moved if a flood is imminent, must be constructed from a location approved by the District Engineer. The location must be above or adequately protected by a dike enclosure to an elevation to be determined at the time of drilling, plus the additional height determined necessary to protect against windwave runup and overtopping.
- The lease area has been used for nesting by the Piping Plover, which is listed on the threatened and endangered species list, therefore all activities must be coordinated with the Corps of Engineers Natural Resource staff located at the Garrison Dam/Lake Sakakawea Project Office.
- There is one known archaeological site within the lease area; therefore, all activities must be coordinated with the Corps of Engineers Archaeologist located at the Garrison Dam/Lake Sakakawea Project Office.
