PURPOSE OF CATALOG

The catalog provides users with a list of items available from the Billings Fire Cache. It is also a reference tool to help ensure safety and efficiency within the cache community. Listed within the Alphabetical, Numerical, and Kit Sections are items which are currently stocked at the Billings Fire Cache. **This catalog is not a complete list of items or support that can be obtained from the cache.** The catalog includes items which are normally used in fire suppression activities. Individual kit components and cache-use-only items are not listed in this catalog and are generally not available outside of kits. For a specific need, contact the Cache Manager.

To ensure rapid processing of your order use:

NFES CATALOG NUMBERS

PROPER DESCRIPTION

CORRECT UNIT OF ISSUE (from BFK catalog)

All Supply &/or Incident Replacement Requisitions are now processed using ROSS (Resource Ordering Supply System)

Remember that the established, primary purpose of the Fire Cache is to support active incidents and is not a normal source of non-emergency replenishment.

Billings Fire Cache has developed this information for the guidance of its authorized customers and is not responsible for the interpretation or use of this information by anyone except its authorized customers. The use of trade, firm, or corporation names in this publication is for the information and convenience of the reader and does not constitute an endorsement by the cache of any product or service to the exclusion of others that may be suitable.

BILLINGS FIRE CACHE

The **Billings Fire Cache** (BFK) is a Type II National Interagency Support Cache operating in association with the Northern Rockies and the National Cache System. The Billings Fire Cache strives for excellence in quality of products and services.

The Cache is located in Billings, Montana. The Cache stores supplies and equipment for a force of 750 firefighters. Restocking is from resources within the National Cache System including DLA and GSA. Normal complement includes six mobile cache support vans, NFES 82069, ready for shipment. Over the last 10 years the average support level has been for a force of 2,600 firefighters therefore resources may be limited during high fire activity while being re-supplied through the National Cache System.

Our Mission is to provide logistical support in response to Wildland Fire and All Risk Emergency Incidents, for the East Zone Northern Rockies Region, with Interagency cooperation in the sharing of resources within the Zone, Region and on a National scale. The Zone that BFK is responsible for is an area nearly the size of Texas.

BFK is financed using normal funding procedures through the BIA Rocky Mountain Regional Office, BLM Montana State Office and Montana State DNRC. These Agencies also provide space, personnel, equipment, and initial stocking with a cost share plan that is reviewed and signed annually, based on an operation plan and budget review. The cache receives direction from the Interagency Board of Directors consisting of the Fire Management Officers from the Bureau of Land Management, the Bureau of Indian Affairs, Forest Service, and State of Montana Department of Natural Resources and Conservation.

Geographical zone directly served by the Billings Fire Cache

AGENCY	UNIT	OFFICE Name and Location	ZONE DISPATCH

Dispatch Centers in the East Zone Northern Rockies (Montana, North and South Dakota) order NFES Cache supplies directly from the Billings Fire Cache. In addition to serving the areas within the BFK geographic zone, BFK on a case-by-case basis directly supports the Cody Interagency Coordination Center (WY-CDC); the Bozeman Interagency Dispatch Center (MT-BZC) and Great Falls Interagency Dispatch Center (MT-GDC) under the *Neighborhood Policy*. The decision to support CDC, BZC and GDC will be made in coordination with the Northern Rockies Cache (NRK).

THE PRIMARY PURPOSE OF BFK IS THE SUPPORT OF ACTIVE INCIDENTS, usually Type III Incidents or larger. **Items are supplied only on a temporary loan basis.** Durable and accountable items are to be returned to the cache at the close of the incident, if not before. Initial Attack Caches maintain supply inventories at a level to handle normal operations; their usual inventory replenishment should be processed through normal channels (local purchases, DLA, GSA, IA Incident Replacement Orders etc.). Direct shipment from vendors, such as DLA, is the most cost-effective way of doing business. BFK is not equipped or intended to fill non-emergency replenishment orders. We welcome your comments regarding changes that would be beneficial to the overall fire program within the area serviced by BFK.

OPERATING HOURS

This chart is only a guide; fire activity will determine when the cache will switch to longer hours
and/or 7-day a week coverage

On-call coverage period is generally June thru October; thus the cache is available for emergencies
24-hours a day during these months

SEASON				

Keeping in mind the safety of cache staff and drivers, BFK policy is to be
Closed from 2300 -- 0600 hours, except for extreme circumstances.

BFK staffing level is minimal during the off-season; the cache will not always be staffed and/or open on a daily basis. Off-season access and use of the cache should be prearranged well in advance.

On-Call for current Fire Season -

The BFK main phone number (406-896-2870) is forwarded to the on-call person evenings and weekends.

ACTIVE INCIDENT ORDERING

All NFES items are ordered as supply ('S') orders. All orders placed for equipment ('E') should be placed with the local or zone Dispatch Center. All supply orders should be limited to those items defined in the NWCG NFES or BFK catalogs. Nonstandard orders for all other equipment, supplies and services, which are not available at the cache should be placed with the Dispatch Center.

All orders must be processed in ROSS and processed through Zone Dispatch Centers. These include incident replacement, incident support, emergency replenishment, hazardous fuels reduction, pre-positioning, project, and training. Orders may be placed directly to BFK by approved Dispatch Centers. All orders to BFK should be placed through ROSS, with confirmation of order by telephone call.

CACHE DEMOB SPECIALIST (CDSP)

The Billings Fire Cache has CDSP's available to support the demobilization of fire supplies from incidents. The CDSP's will work in cooperation with the incident Logistics Section and the Supply Unit Leader. The CDSP's will work for the Billings Fire Cache.

FILL OR KILL POLICY

When BFK "kills" (unable to fill-UTF) an order, BFK will check with the incident to see if they want the order passed to the next level.

- If they do, the order will be forwarded on to MT-NRK (the Northern Rockies Cache in Missoula).

- If they do not, then the order is killed and finalized on that particular request number.

BFK will note any "UTF" or Partial fills in the comment lines on the Issue and Shipping Status Reports. If the incident requires the remainder of a partially filled item, they will need to reorder (using a new S #). **There are no back orders** on emergency resource orders. Neither Billings nor the Missoula Cache process any back orders.

SHIPPING

BFK will call and provide shipping status immediately upon filling an order to the incident/dispatch office (via the fax, if requested, or electronic mail); this report will serve as notification/confirmation of resources assigned and shipping information. Any partial filled or killed orders will be noted in the comment lines of the ISSUE REPORT and followed up by a phone call (if possible) to appropriate area(s).

BFK, in conjunction with Billings Logistics Dispatch, will make the necessary arrangements to transport supplies. Shipments will be scheduled throughout the day as soon after receiving the order as possible to ensure arrival at the incident camp no later than 2300 hours. Drivers unable

to deliver supplies and return to home base by 2300 hours will stay overnight at the incident and return in the morning. Otherwise, the shipment will be transported the next morning.
DRIVERS ARE NOT TO BE UNNECESSARILY DETAINED.

SCHEDULED ORDERING TIMES

During the first 36 hours of an incident, BFK will accommodate orders and adjust operating hours as necessary. **After** the first 36 hours, BFK will request that all incidents place supply order(s) at a mutually agreed-upon designated time as determined/discussed with the Cache.

OTHER TYPES OF ORDERS

RESTOCK

Replacement/restock orders **MUST** be the direct result of incident suppression activities and **MUST** be ordered through ROSS.

Durable items will be supplied as a temporary loan only and, at the close of the incident, should be returned to BFK; customers intending to keep ordered items are **EXPECTED** and will be **DIRECTED** to order through a Vendor.

INCIDENT REPLACEMENT REQUISITIONS

Prior to release from incidents, firefighting resources will prepare and have approved by the Supply Unit Leader or Agency Fire Management Officer an Incident Replacement Requisition (NFES 1300 or 1286 – see Forms Section pg. 23) for items that have been lost, consumed, or worn out during the incident; these resource orders **SHOULD** be processed at the incident. If that is not possible, replacement orders must be processed within 30 days of control of the incident and can be processed at the personnel's home unit, BFK, or the nearest National Geographic Area Cache. The Supply Unit must assign Incident to Cache S#'s (100,000-199,999)

ROUTINE

Non-emergency (routine) orders should be directed to the source of supply, e.g., DLA, GSA, or private vendors. Purchasing direct from the vendor is the most cost-effective way of doing business. BFK is not equipped or intended to fill **routine** replenishment orders, but will assist with information such as vendor or other sources available. For your convenience, information regarding GSA/DLA is provided in the Introduction Section of the NWCG Catalog.

HINTS FOR REVIEWING ORDERS

If a Resource Order is incomplete or unclear, the order cannot be processed until all necessary information is received or verified. If all necessary/accurate information is on the order at the time it is placed, it will expedite the order and delivery time.

Understanding what the incident is requesting:

- Aerial Ignition Devices vs. Ping pong balls (not table-top)
- Pump Kit vs. Pumpkin (Tank, collapsible/folding)
- 3000 FT of 3-foot hose vs. 30 LG of 100-foot hose (LG is correct U/I)

ASK – If it sounds weird or you are not clear, please ask for clarification. See cross- reference table (pg. 20).

SUGGESTIONS TO THE ORDERING UNITS:

TAPE: It is a good idea to order extra tape for sealing boxes at the close of the incident.

Cellophane tape, shrink-wrap, rubber bands, etc. are preferred rather than filament tape on all items except fiberboard boxes.

SHRINKWRAP, PALLET COVER BANDS, PALLET COVERS: Added to the mobile support vans and available at BFK cache.

PALLETS: May be available at BFK and other caches to help facilitate returns.

HOSE ROLLERS: All hose should be rolled before return to the cache. Hose rollers (hand and motorized) are available at the caches.

TENTS: If tents are ordered, make sure tent poles (two kinds- upright & ridge) and stakes are also ordered; **tents do NOT come with poles or stakes.**

PROPANE: 0491 Tank, Propane must now be ordered separately when ordering the 0480 Coffee Kit: **Coffee kits do NOT come with propane.**

This page Intentionally Left Blank

INITIAL OVERHEAD PERSONNEL GEAR NEEDS

Red-carded individuals not affiliated with an initial attack cache may be outfitted with gear by BFK on the condition that each individual's agency provides a proper project code; these account codes must be obtained prior to filling the order. These offices are the BIA Billings Area Office, BLM Montana State Office / Billings Field Office, and the Custer Gallatin National Forest Supervisor's Office. Employees outside of these specific local offices should go through their local initial attack cache for overhead personnel supply needs. In order to maintain better control of the cache inventory, to reduce administrative tracking of individual personnel equipment, and to fulfill the true purpose of supporting incidents, the following procedures will be followed.

Once a year, prior to May 15th, the local agency Fire Management representative of these three offices is asked to submit a consolidated resource order for supplying individual overhead with gear necessary for supporting incidents. The following management numbers will be established each year and maintained by BFK and the FMO.

For BLM/MSO: MTBFK000025	other order – BLM support
For BIA/RMR: MTBFK000013	other order – BIA support
For FS/CGF: MTBFK000014	other order – CGF support

Under revised regulations, BFK can no longer use 9999's as a charge code for individual outfitting. It is the responsibility of each organization to either purchase the item through DLA/GSA or contact the respective FMO's to **obtain a project code or appropriate charge code.**

Individuals needing shirts, jeans, and gloves should make arrangements at the cache to be fitted so that the proper NFES number item can be ordered. This is especially important for individuals that are attending training because exchanges may not always be possible at the training site. The following items are available from BFK. (Any additional needs should be provided by the agency through local procurement or DLA/GSA).

_____Shirts	2 EA NFES – varies depending on size
_____Jeans, BDU	2 PR NFES – varies depending on size
_____Gloves	1 PR NFES – varies depending on size
_____Fire Shelter, Complete M2002	1 EA NFES 0925 or 0975, large size
_____Hard Hat w/chin strap	1 EA NFES 0109
_____Headlamp	1 EA NFES 0718 (order batteries separately)
_____Batteries, AA	1 PG NFES 0030
_____Goggles	1 PR NFES 0318
_____Earplugs	2 PG NFES 1027
_____First Aid Kit, 1 Person	1 KT NFES 0067
_____Pack, Personal Gear	1 EA NFES 1855
_____Pack, Fire line, Complete	1 EA NFES 0674
_____Bag, Sleeping	1 EA NFES 0022
_____Canteen w/o cover	2 EA NFES 0037

Once the order is approved by the Agency FMO and received, the cache will pull all the supplies and make them available at the cache for the individual(s) to pick up. An ISSUE REPORT showing items, quantity, and costs will be given to the individual when they pick up their order and available to the respective agencies. This order should cover all the supply needs for red-carded individuals for each unit. **It will NOT be regular practice to outfit individual overhead or crews at the time of their incident assignments during fire season.**

Agency FMO Approval _____ Date _____

Cache Manager Receipt _____ Date _____

This Page Intentionally Left Blank

Equipment vs. Supplies – NFES vs. non-NFES – Local vs. Cache

All NFES items are to be considered supplies and ordered with “S” numbers; equipment orders, now ordered with “S” numbers, will continue to be ordered through dispatch coordination centers. *See the Nat’l Mob Guide for standardization of the definitions of Equipment & Supplies.*

EQUIPMENT All equipment orders must be placed with Dispatch Centers. Equipment is tracked as an individual resource.

SUPPLIES

Supply items include all, but are not limited to, NFES items, mobile cache vans, telecommunications equipment, ATMUs, RAWs, etc. All NIRSC radio equipment will be ordered as (S) requests in ROSS. **It is important to note that established ordering channels for radios and RAWs have not changed and will continue to be ordered through the dispatch coordination offices.** BFK’s involvement in these orders is providing a pick-up and delivery point. The Dispatch Center may coordinate with BFK/NIRSC to return the Starter System to NIRSC. Discuss the preferred shipping method with the NRCC Equipment Dispatcher.

Supply orders for multiple quantities of “like” items do not require individual S numbers. So when ordering ten generators, do not assign ten S numbers; they can all be placed and filled on one S number.

NFES: BFK now receives supply orders through ROSS. NFES supply orders are processed and filled and notification given through proper channels. Transportation is arranged through Billings Logistics Dispatch. Items can include tents, chain saw kits, logistics kits, medical kits, tools, cache vans, etc. If the item is a National Resource or National Critical Item, BFK will coordinate with dispatch per established procedures.

Non-NFES: Non-NFES supplies are handled by the dispatch center Equipment/Supply Dispatcher who works directly with the local agency purchase department to fill, if possible. This includes the receiving of orders, purchasing, payment, mobilization, demobilization, paperwork, transportation, and notification process. When the need exceeds the dispatch center’s purchasing capability, local personnel or National Buying teams are available to assist with purchasing and contracting needs for the non-cache items. Some of the items are Band-Aids, juice, bleach, motel rooms, supplemental food, personal hygiene items, etc.

Local vs. Cache

There are some items that have NFES numbers and are carried by the Cache but are stocked **only** for building kits and are generally not available outside of the kits. These include items such as medical supplies, coffee, pens, pencils, and photocopy paper. The Cache issues medical kits, logistics section kits, coffee heating kits, office supply kits, etc. but normally **does not** send out the individual kit content items. The best way to get these individual items is through the Dispatch Center and the local purchasing agent. If unsure on how to order an item, contact BFK for assistance.

Note: Items such as chain saws and pumps are normally not available from BFK outside of a kit; contact the Cache if special needs exist.

MOBILE CACHE SUPPORT VANS

The purpose for the cache van is to establish an Incident Base Camp and not to support two hundred fifty firefighters. The van contents meet the national standards with additional items per Northern Rockies standards. See the kit-packing list in the Kit Section of this catalog for the kit contents, NFES 82069.

Cache vans are ordered on an “S” number through the Billings Fire Cache. BFK maintains six mobile cache vans. The cache vans are kept in Billings at BFK. BFK will authorize any assignment of a van. BFK will process the issue of the van to the incident.

The cache vans are pre-loaded and can be on the road within a short time during regular business hours. Ordering of the tractor will be coordinated with Billings Dispatch. BFK will issue a cache van for Type I & II Incidents and only when there is an established Incident Command Post (ICP). The trailer and tractor will not remain on the fire. The items need to be unloaded and the empty trailer brought back to BFK as soon as possible. This will enable the cache to get another van built and ready to dispatch. **NO EMPTY cache van trailers are available from BFK.** See Chapter 70 of the NRCC Mobilization Guide for a listing of other vans and base units within the geographic zone.

TYPE III TEAM PRE-ORDER

The Type III Team can submit their pre-order to Dispatch. The pre-order is generally designed to support about 50 personnel and helps to establish the team.

PREPOSITIONED ITEMS

Billings Fire Cache prepositions only certain items. All items can be supplied in a relatively short period of time. Therefore, units must make a realistic assessment and order only what is needed. **If the items are requested for long-term or permanent retention, arrangements should be made for purchasing the items.**

The following cache items will be pre-positioned at BFK from MT-NRK and are available in limited quantities: NFES #1760, First Aid, 100-Person Kit.

The 4390 Starter System Kit is ordered as needed. The System will be ordered as “Supply” through the BDC Equipment/Supply desk. BFK will be the delivery and pick-up point for the ordered System. The Cache is not involved in the mobilization/demobilization process.

The ordering incident (communications unit) is responsible for a complete inventory of the Starter Kit when returning it from the incident. It is also the Incident's responsibility to disconnect any battery cables (such as in a repeater box) before shipping. Per NIRSC, the Starter System is sent as one unit, and not split up. To maintain quality and quantity for the field, each Starter System or kit will be returned directly to NIRSC for refurbishment immediately after each assignment. In conjunction with the Incident, Logistics Support, and the nearest Interagency Support Cache, arrangements may be made to coordinate delivery to NIRSC.

ACCOUNTABILITY

All items sent out of BFK are loans and will be processed in the ROSS system. All items purchased with emergency funds by the incident become property of the Fire Cache or purchasing agency and are to be marked and used for "Fire Use Only." An Issue Report will be sent with all cache orders and must be signed by the proper authorities at the Agency/Incident as received and returned to BFK; a copy will be sent for the Incident's records. When the items have been delivered to the correct destination, the items become the incident's responsibility. Applicable agency property regulations and the Federal Property Management Regulations apply. The Issue Report will be treated as a formal issue of property, durable and non-durable goods to an incident. **It is the responsibility of the receiving unit to see that ALL Accountable property, durable property, and any consumable goods remaining at the close of an incident are returned to the issuing cache.** It is the responsibility of the receiving unit to prepare reports of loss, or damage, for all durable and accountable property not returned to the Cache within 30 days of demobilization. The Incident Commander or Logistics Section Chief should review, sign, and take any follow-up action on these reports to the incident close out; after that it becomes the responsibility of the jurisdiction agency. All reports of loss or damage must be submitted to the Incident Agency and the issuing cache. (See NFES 1139 NWCG HB2, Interagency Incident Business Management Handbook 35.5 & Form OF-289).

Accountable Property: (may be referred to as capital equipment) Items with a purchase price of \$5,000 (USDI or USDA) or greater. Accountable property also applies to items that the Incident Agency considers sensitive (e.g., cameras, chain saws). Property is generally tagged with an agency identification number. These items **MUST** be returned to the supplying cache. If the items are destroyed, burned over, etc. the remnants should be returned to the cache accompanied by a report of loss/damaged items. (pg. 33) The Cache property officer has to verify and account for all loss/damaged Accountable property.

Pumps, chain saws, and radios are usually in short supply and **must** be returned to the issuing cache as soon as the need is over. **If this property is lost or destroyed, written notification must be provided to the issuing cache.** If the item does not operate in satisfactory manner, note the possible cause of the problem on a tag and attach it to the item.

BFK cannot credit an incident for returns of out-of-date, condemned, or non-repairable items. If items are damaged or unserviceable, please tag the item as such.

Durable Property: Durable properties are those non-accountable items that have a useful life expectancy greater than one incident (e.g., sleeping bags, water-handling accessories, tents, Nomex (PPE), headlamps, tools). This property may be marked with paint or etching to show “US GOV”, or an agency-specific marking. These items should be returned to the supplying cache, or a report of loss/damaged items should be sent to the cache.

Using tape, secure box flaps in a closed position. Please use regular cellophane tape, shrink (stretch) wrap, hose rubber bands, etc. rather than fiber tape. Stretch plastic wrap is now on the mobile cache support vans.

Consumable Goods: Consumable goods are items normally expected to be consumed on the incident (e.g., batteries, Meals-Ready-to-Eat, plastic canteens). Leftovers of these items can be returned to the cache or given to the local agency.

Some items are consumable and when used should not be returned; e.g., disposable mess-gear, canteens, cubies, etc. During demobilization of an incident, partial cartons of excess consumables can be returned to the cache for issuance. Documentation of disposal of large quantities of these items is required. Another source for utilizing partial boxes is the local district, forest, or agency responsible for the incident. Used batteries may be thrown away, all alkaline batteries (AA, repeater, etc.) manufactured after 1989 can be safely disposed of in a landfill.

FUEL, GAS ENGINES, PURGING & HAZARDOUS ITEMS: see the Hazardous Materials section of this catalog for how to handle these items.

NOTE: Northern Rockies Fire Cache uses Standard Cache Refurbishment Costs for most items they supply. See the NRCC Mobilization Guide, Chapter 70, for costs. If a chain saw kit is opened just to get the earplugs, the same refurbishment amount is charged as if the entire kit contents were used. Only open boxes, kits, etc. if necessary, not just because it’s easier than ordering an item.

Fire Loss/Use Tolerance: The goal of property management on incidents is to prevent the loss of property and supplies. To accomplish this goal, Incident Management Teams (IMT) and Incident Agencies may develop Loss/Use tolerance guidelines. These guidelines are frequently a percentage of the durable property. BFK’s Fire Loss/Use Tolerance goal is 10%. BFK annually has less than 1.0% Loss/Use tolerance. If the loss of durable items exceeds loss tolerance guidelines, the IMT needs to provide documentation of the loss to the Incident Agency and issuing cache.

RETURNS

All returns must be identified with the return agency identifier, incident name and incident number to ensure proper accountability. The return documentation needs to contain a full inventory, including NFES catalog numbers, description of items, quantity, and unit of issue of each item being returned. It is important to ensure accurate crediting of the returns to the correct ordering agency and incident. Upon request, BFK can supply Return Worksheets for specific

incidents. The Incident Waybill (NFES 1472) form or an equivalent may also be used. **It is the ordering agency's responsibility to return items using the proper procedure, not the cache's.**

Returns must be received at BFK within 30 days from close of the incident and be accompanied with required documentation to accurately reflect incident costs.

For fires, the "control date" is used as the close of an incident. BFK may not be able to accurately credit returns after 30 days from the close of the incident.

The lack of timely returns of fire supplies to the Cache impedes the ability to supply incidents or other caches. Maximum support can be achieved by prompt returns of supplies to the cache that issued them upon demobilization, or sooner if no longer needed. It is strongly recommended that a Cache Demobilization Specialist (CDSP) be ordered for all large incidents and incidents utilizing multiple sources of supply. BFK can support this position.

If items are taken from one incident to another incident (without returning to the cache) it is both incidents responsibility to inform the Cache of the items that are being transferred. It also must be confirmed which incident should be credited for the returns when they are finally returned to the Cache. **This practice is highly discouraged because it makes tracking and accounting very difficult. If it does occur, make sure all items are carefully inventoried and transferred to the new incident and that documentation is sent to BFK,** who will share info with any other affected caches. This documentation becomes very important in the case of Trespass Fires. A Cache Demobilization Specialist should also be considered in these situations. **Request the BFK Incident Transfer Policy.**

Caches are NOT hazardous materials disposal facilities. All fueled equipment and fuel containers must be emptied and mechanically purged BEFORE shipping back to BFK. This is a DOT regulation subject to penalties. See the Hazmat Section of this catalog for more information, starting on page 35.

SPECIFICS ON HOW TO RETURN ITEMS

Extra effort by the incident supply unit in sorting, marking, packing, and inventorying will greatly assist both the incident supply and the receiving support cache.

Please emphasize the use of protective attire, such as latex gloves, dust masks, long sleeve shirts, helmets, etc. when handling used equipment. This is especially important when rolling hose or handling used clothing and sleeping bags/mats.

Sort and Separate items:

By NFES Number

Used from Unused

Contaminated (poison ivy/oak, etc.) Serviceable from Unserviceable. The 'Fire Equipment Storage and Refurbishing Standards' NFES 2249 Guidelines are useful in determining the condition of an item. Coordinate with the issuing cache on disposal of unserviceable items.

If possible, all items should be returned in the original packaging by the standard pack; e.g., 10 shovels per box, 10 helmets per box. Boxes/items should be clearly marked or tagged with NFES number, description, quantity and status; used, unused, damaged, contaminated, not in working order, unserviceable, purged, etc. If an item is not working, please tag as such and try to describe the problem.

COMMUNICATIONS EQUIPMENT must be returned from the incident or the local dispatch to the National Incident Radio Support Cache (NIRSC) at the National Interagency Fire Center in Boise, ID. This must be done as soon as the incident or the need is over. An inventoried waybill **MUST** accompany the returned boxes. Please take a moment before sealing the kit box to ensure contents are inventoried and will not be damaged in transit. Accountable property reports are included in communications kits; use as necessary to report lost or damaged equipment. Make sure the battery cables are disconnected.

Do not hold radios on a local unit or reassign to another incident. They must be returned to NIRSC for refurbishing.

Hose	Sort by NFES. Drain and roll all hose. Do not return hose that was not issued by the cache. It should be returned to the unit that supplied it to the incident. Hand and gas hose rollers are available on order at the caches.
Clothing/Sleeping Bags	Separate serviceable from unserviceable. If items are contaminated (poison oak/ivy), bag separately and mark bag that items have been contaminated. Always use gloves and long sleeve shirts when handling used clothing/sleeping bags.
Sleeping Mats	Use original carton or bundle in groups of 50 with plastic wrap (NFES 0315/0316).
Tables/Chairs	Make sure the tables/chairs are cache items and not a contractor's, such as the caterer. Remove all signs, tape, etc. added at the incident. Plastic wrap chairs 5 to a bundle or re-pack in the original carton.
Tools	Return ALL tools, regardless of condition. Use original cartons to help prevent injuries. If possible, replace sheaths. Bundle in groups of 5 with hose rubber bands (NFES 0727) or stretch plastic wrap (NFES 0315/0316). DO NOT USE FIBER TAPE on tool handles , this tends to ruin the handles.
Water Handling	Sort by NFES and box them up.

NFES NUMBER ASSIGNMENTS

The NFES number assignments provide a standard system of identification. Items are admitted to, changed within, or deleted from the NFES system per field input to the NFES Geographic Cache Managers. They in turn decide if the request is best handled within the geographic area or forwarded to the NFES Committee for national consideration. The NFES Representative is the focus for these recommendations. New items are agreed to and accepted by the NFES Committee and the NFES Geographic Area Caches. Changes and deletions follow the same procedure and are monitored by the NFES Committee Chair. See the NWCG Catalog for more information on the process of introduction of a new NFES item.

0001 – 6999: (except 4000-5999) Nationally stocked fire support items, including kits.

4000 – 4999: Communications and Electronic Kits. This series is assigned by the National Incident Radio Support Cache (NIRSC), NIFC and monitored by the NFES Committee Chair. Assignments and changes are reported in the same procedures as above.

7000 – 9999: Local Use Items. Are assigned locally by caches. These item numbers are not the standardized national item.

7000 Are assigned to kit components or cache-use-only items. These are not normally shipped out of the cache as individual items.

8000 Are assigned to non-standard items that BFK carries and are available for incident use, but are not covered in the national standard numbers (0001-6999)

9000 Northern Rockies Cache (NRK) uses these for individual medical items.

DOUBLE NFES NUMBERS- SAME ITEM

There are several NFES items that are assigned more than one NFES number. The reason for this is different sizes or units of issue or because the item is sent out by itself and in a kit as a component. Below are some examples. Not all NFES numbers are carried by BFK.

Description			
Bag, Cotton, Lunch or Tool, 10" x 24"	0018 3318	BD EA	100/BD
Bag, Garbage Can Liner, Plastic, 30 GL, 39" x 33"	0021 3300	BX EA	125/BX
Cord, Cotton, Braided, 1/8" x 3000' 1/8" x 100'	1285 0052	SL HK	30 HK/SL
Cord, Nylon Shroud	0533 3305	SL HK	100 FT/HK
Rag, Wiping, 50 LB Bale 1 LB Bundle	0565 3309	BE LB	50 LB/BE
Sheeting, Plastic, Black, 20' x 100' 10' x 20'	0144 1287	RO SH	10 SH/RO

NFES ITEM DELETIONS, ADDITIONS, CHANGES

DELETED ITEMS –

These forms have been deleted nationally (2014) & are no longer available in the Cache system: 0825,1325,1326,1327,1328,1330,1331,1332,1335,1337,1338,1339,1340,1341,1351,1353,2221,2227

ADDED ITEMS –

- New in 2014 (BKF) - 2842 & 2846 BDU, 0975 Large Shelter
- New in 2015- 0718 Headlamp (replaces 0667)
- New in 2016- (BKF) - 6041 Volume Pump Kit, 1077 IRPG, 1048 Sprinkler Kit

CHANGES –

- BFK has complied with all recommended changes from the National Kit Committee for 2016
- BFK no longer carries the 0943 Jug, insulated, 5 GL
- BFK now carries:
 - 000020 Container, 1 GL cubitainer w/ small mouth, w/ box
 - 000880 Cover, pallet, clear
 - 000634 Band, rubber pallet cover
 - 001880 Oil, bar & chain, 1 GL
 - 007443 Container, 5 GL, plastic, collapsible, w/ overpack - EA
 - 001077 Guide, pms461 – Incident Response Pocket Guide (2014)
 - 006041 Kit- Pump, Volume, 3", w/ accessories
 - 001048 Kit- Sprinkler (2008)

All Kit changes for the current year will be reflected in the kit contents lists in this catalog.

ABBREVIATIONS

The abbreviations shown below are for the Unit of Issue (U/I). This is how cache items are issued. This is also how items should be ordered from the caches. Many of the items at MT-BFK are stocked in **standard packs**. Standard packs may or may not be the same as the unit of issue. If possible, order quantities equivalent to the standard pack.

Example: NFES 0030 **AA Batteries** come in Unit of Issue of PG, if you want 10 boxes, you would order 80 PG, because Cache **Standard PK = 8 PG/ per BX**.

Incident Replacement Requisition Processing for NFES items **NEW 2012**

These directions have been created and distributed by the **National Interagency Fire Center (NIFC)**

The first step in the process is for an incident replacement requisition (OF-315/NFES #001300) to be filled out and signed by an authorized incident management team member or host unit agency official. IMTs may authorize replacement of NFES items, as can a unit's Fire Management Officer (FMO) for incidents without an assigned IMT. Please see the National Interagency Mobilization Guide, the NWCG National Fire Equipment System Catalog, and the Interagency Incident Management Handbook excerpts in Attachment 1.

Incident replacement requisitions typically are initiated by incident personnel for Type 1 and 2 incidents and by dispatchers for Type 3 and 4 incidents (or those incidents for which there is not a fully functioning Supply Unit).

In almost all cases, incident support caches only fill requests for NFES items. For this reason, requests for non-NFES items should be recorded on a separate incident replacement requisition for processing by a home unit, and not placed with a cache.

If Geographic Area policy allows direct ordering between incidents and caches, request numbers should be assigned to replacement requisitions by incident personnel and the requisitions placed directly with the servicing cache (i.e. the cache with primary responsibility to support the incident). Cache personnel generally prefer direct ordering so that they can straighten out any questions about items and quantities directly with the requesting party. A block of request numbers from S-100,000 to 199,999 is reserved for "incident to cache" ordering.

If Geographic Area policy is for incident personnel to place all supply orders through a dispatch office, rather than directly with caches, incident replacement requisitions should be placed with a dispatch office. In this case, request numbers may be assigned by dispatch personnel, the request entered in ROSS, and the requests placed with the cache through the ROSS-ICBS interface. This procedure will also typically be used for Type 3 and 4 incidents in which the requisition is initiated in the dispatch office. If necessary the ROSS user can usually determine the next unassigned request number by using the "Used Request Number" function in ROSS.

There is currently not a specific "replacement" order type in ROSS. In order to make sure that cache personnel know that a ROSS order represents an incident replacement requisition, the ROSS user should enter the words "incident replacement requisition" in the ROSS "Special Needs" field of each replacement request.

If a dispatch office receives an incident replacement requisition with pre-assigned request numbers within the "incident to cache" block (S-100,000 to 199,999), they should simply fax the requisition to the cache for processing. It's important to note that for cache personnel to enter any supply request in ICBS, the request number must fall within the range of "incident-to-cache" request numbers set aside for this purpose. Also, no request numbers in this range can be entered in ROSS.

If a demobilized resource was unable to get an incident replacement requisition signed or submitted prior to leaving an incident, the form should be filled out and sent to the incident

Incident Replacement Requisition Processing for NFES items continued

dispatch office for request number assignment, approval and placement with the servicing cache. Home unit dispatchers can often help facilitate this process for demobilized personnel. All Incident Replacement Requisitions for **non-NFES** items should be submitted by incident personnel to the host dispatch office. A dispatcher will usually enter the requests in ROSS and follow incident host agency policy for obtaining approval of the replacement requisition. If approved for home unit replacement, the dispatcher will show the requests as “fill/close” with the remark “Filled by home unit” in ROSS. If not approved by the incident host agency, the dispatcher will show these requests as cancelled “Not approved” in ROSS.

Date: April 2016

To: Incident Supply Unit Leader; Ordering

From: Josh King
Fire Cache Manager
Billings Category II National Interagency Support Cache

Subject: **Radio Incident Demobilization**

Our policy for the Demobilization of Radios and Communication Equipment is in accordance with the directions in the:

National Interagency Mobilization Guide, Page 44

“NIRSC radio systems and kits should be inventoried, sealed, and returned promptly to NIRSC/NIFC or the nearest National Fire Support Cache. Do not stockpile kits. Spare seals are supplied in each box. Incidents are responsible for ensuring all radio systems or kits are returned or accounted for on a Property Loss Statement”.

Billings 2016 Cache Annual Operating Plan, Page 12

All NIRSC radio equipment will be ordered as (S) Requests in ROSS. It is important to note that established ordering channels for radios, ATMU's, REM's, and RAW's is through the local Dispatch Center. BFK's involvement with these orders is to provide a staging point for pick-up and delivery. The Dispatch Center may coordinate with BFK/NIRSC to return the Starter System to NIRSC. Discuss the preferred shipping method with the NRCC Equipment Dispatcher.

NIRSC Radio equipment is ordered in ROSS through an Incident's supporting Dispatch Center. All Mobe/Demob must be arranged at the Local Dispatch Center supporting the incident in order to track and maintain proper property accountability. The Billings Fire Cache is not the responsible party of accountability for this equipment- the Incident and Dispatch Centers are.

Josh King
Supervisory General Supply Specialist

SPECIFIC EXCERPTS

*Per 49 CFR 171.8 (05/04), **Hazardous Material** means a substance or material, that the Secretary of Transportation has determined is capable of posing an unreasonable risk to health, safety, and property when transported in commerce, and has been designated as hazardous under section 5103 of Federal hazardous materials transportation law (49 U.S.C. 5103). The term includes hazardous substances, hazardous wastes, marine pollutants, and elevated temperature materials, materials designated as hazardous in Hazardous Materials Table (see 49 CFR 172.101), and materials that meet the defining criteria for hazardous classes and divisions in part 173 of subchapter C of this chapter.*

*Per 49 CFR 172.200, **Shipping Papers** (03/05) (a) Description of hazardous materials required. Except as otherwise provided in this subpart, each person who offers a hazardous material for transportation shall describe the hazardous material on the shipping paper in the manner required by this subpart.*

*Per 49 CFR 172.300, **Marking** (03/05) (a) Each person who offers a hazardous material for transportation shall mark each package, freight container, and transport vehicle containing the hazardous material in the manner required by this subpart.*

*Per 49 CFR 172.400, **Labeling** (03/05) Each person who offers for transportation or transports a hazardous material in any package or container, shall label the package or container with labels specified for the materials in the 172.101 table in 49 CFR.*

*Per 49 CFR 172.700, **Training** (05/03) (b) Scope. Training as used in this subpart means a systematic program that ensures a HAZMAT employee has familiarity with the general provisions of this subchapter, is able to recognize and identify hazardous materials, has knowledge of emergency response information, self-protection measures and accident prevention methods.*

*Per 29 CFR 1910.1200 (12/00), **Hazard Communication** (a) Purpose. (1) The purpose of this section is to ensure that hazards of all chemicals produced or imported are evaluated, and that information concerning their hazards is transmitted to employers and employees. This transmittal of information is to be accomplished by means of comprehensive hazard communication programs, which are to include container labeling and other forms of warning, material safety data sheets and employee training.*

BFK and other caches are not hazardous materials disposal facilities

It is the responsibility of the incident to properly dispose of unused and waste fuel as well as any other hazardous material, as prescribed by applicable laws, rules and regulations. Hazardous material shipments are regulated by the Department of Transportation. OSHA regulates the storage, usage and employer requirements. Special precautions and documentation requirements must be adhered to when shipping and handling hazardous materials. Anyone shipping or handling hazardous material that is not familiar with the requirements should contact the agency hazardous materials specialist for instructions. Noncompliance may result in civil penalties up to \$27,500 being assessed to the individual shipping the hazardous material.

IT IS AGAINST THE LAW NOT TO NOTIFY THE CARRIER ABOUT HAZARDOUS MATERIAL BEING SHIPPED

Any such material received by the cache will be disposed in accordance with applicable laws, rules and regulations; the cost of which will be charged to the responsible person/incident.

When purchasing items, request the Safety Data Sheet (SDS) for any hazardous materials. It is best to mark the item with the date of purchase, especially for paints. If you do not know if the item is classified as a hazardous material, ask the vendor or check with your agency hazardous materials specialist.

When shipping hazardous materials, make sure to complete all required paperwork. This includes a description of the item including identification number, proper shipping name, hazard class, packing group and total quantity/weight of items.

The training requirements in 49 CFR 172 are applicable to Federal employees because the term employer is defined in the regulations to include United States Departments and Agencies when shipping in commerce.

Hazardous materials are very serious and should be treated as such, with the responsibility of any mishaps resting on the individual rather than that of the government. Important preventions to remember are: stay alert, know what you are handling, and ask for help from the recognized experts.

Remember, any fueled equipment and fuel containers (except propane) must be empty and mechanically purged BEFORE shipping. DO NOT use liquid purge. See steps for mechanically purging on page 41.

It is best to transport empty fuel containers in an open-air, non-enclosed vehicle. If this cannot be done, then here are the **Common Transport Rules to Remember:**

1. Only packaging described in CFR 49 is to be used
2. Secure supplies with packaging to prevent damage
3. Packaging is secured in transport vehicle to prevent movement
4. No sharp projections within the cargo hold area of the transport vehicle
5. Ensure no risk exists for puncture, damage, and/or ignition
6. Make sure multiple classes of materials may or may not be shipped together
7. Load hazardous materials in the rear of transport vehicle
8. Ensure the total weight/volume of all hazardous materials in transport vehicle does not exceed allowable limits for any one type

SAFETY IS EVERYONE'S RESPONSIBILITY

Safety First, Every Job, Every Time

There are many dangers in modern Incident camps, in addition to the expected first aid accidents. Below is a list of a few of these dangers more serious than first aid accidents:

- Hazardous Materials
- Bloodborne Pathogens from contact with Bio-hazards such as body fluids
- Hantavirus disease caused by exposure to rodent excreta

To help limit exposure, use protective attire, such as latex gloves, leather gloves, dust masks, long sleeve shirts, and helmets when handling used equipment. This is especially important when handling potentially contaminated items.

Hazardous material management is a team effort required by law. Key points:

- Employer Knowledge of Chemical Hazards
- Training
- Chemical Inventory
- Labeling
- SDS (previously known as MSDS) Always request and read them
- Chemical information availability (read containers, etc.)
- Hazardous communication implementation plan (right-to-know)
- Emergency Planning

Four Methods of Employee Protection:

- Safe work practices
- Engineering control (remove, minimize hazards)
- Administrative control (conditions of employment, training, etc.)
- Personal protective equipment (PPE)

5 R's of Safety

- Recognize
- Retreat
- Report
- Record
- Restrict

Routes of Exposure

- Inhalation
- Ingestion
- Injection
- Absorption

**NUMBER ONE CONTRIBUTOR TO ACCIDENTS IS FAILURE TO FOLLOW
ESTABLISHED POLICIES AND PROCEDURES. REGULATIONS ARE IN PLACE TO PREVENT
ACCIDENTS AND SAVE LIVES.**

Contact your safety officer at the incident or local agency for more information.

HAZMAT ITEMS

Hazardous materials that may be encountered are: aerial ignition devices (Ping-Pong balls), fuels, wet batteries, battery acid, aerosol paint, paint thinners, cleaning products, small engines that may contain fuel after use, propane, fusee's, and used fuel hoses. Below are examples of the most common hazardous material that Incidents and BFK ship:

Oxygen, compressed: NFES 001727, 001728, & 001835 (Oxygen Therapy Kits) 3 Cylinders in 001835 Kit

UN1072, OXYGEN, COMPRESSED, 2.2 (5.1)

Marking & Label: NON-FLAMMABLE GAS AND OXIDIZER LABEL, OR
OXYGEN LABEL ONLY

Requires approved bottle with relief valve and packed in a strong shipping box
Suggested quantity limit per load: 12 Cylinders (CY) @ 8 Lbs. Each, (96 Lbs.)

Extinguisher, Fire: 20 A:120 BC: NFES 000307

UN1044, FIRE EXTINGUISHER, 2.2

Marking & Label: UP ARROWS AND NONFLAMMABLE GAS LABEL
173.309 contain exceptions from labeling & placarding when shipping by ground and packed in a strong shipping box (Cardboard container is suitable).
Suggested quantity limit per load: 21 Cylinders (CY), 20 LB tank, @ 38 Lbs. Each, (798 Lbs.)

Fusee, signal device, hand: NFES 000105

NA1325, FUSEE, 4.1, PG II

Marking & Label: FLAMMABLE SOLID LABEL, KEEP FIRE AWAY
173.184 – must be packed in 4G UN POP fiberboard box
Commercial air restricted; additional requirements apply
Suggested quantity limit per load: 21 BX @ 38 Lbs. Each, (798 Lbs.)

Tank, Propane: NFES 000491

UN1075, PETROLEUM GASES, LIQUEFIED, 2.1

Marking & Label: FLAMMABLE GAS LABEL
Commercial air restricted; additional requirements
Quantity limit per load: 21 Cylinders (CY), 20 Lb. Tanks, @ 38 Lbs. Each, (798 Lbs.)

Can, Gasoline, 5 Gal, DOT style. NFES 000606 is HAZMAT if **NOT** in a carton or **NOT** drained and purged.

The CAN is **NOT HAZMAT** if it is drained and mechanically purged and in a carton.

Proper Declaration if it is not drained and purged: **UN1203, GASOLINE, 3, PG II**

Label required on can: FLAMMABLE LIQUID

Marking on can: GASOLINE, UN1203

Suggested quantity limit per load: 50 EA @ 5 Lbs. EA, gas must be < 1 oz. in each can, (250 Lbs.)

Aerial Ignition Device, Ping-Pong ball: NFES 003411, (NOT Regulated by 49 CFR if labels are removed)

IF HAS LABELS -Proper Declaration: **UN1490, POTASSIUM PERMANGANATE, 5.1, PG II**

Marking and Labels: 173.4 for small Quantity Exception. NO labels required. The shipper must certify conformance with this section by marking the outside of each package with the statement: "This package conforms to 49 CFR 173.4". If labels are on each box and not removed, then certify as HAZMAT.

Quantity Limits: NO limit, if 173.4 applies. If shipped as HAZMAT, limit is 25 BX @ 8 Lbs./ BX (200 Lbs.)

The above limits were set by Northern Rockies' Haul-Back Policy at 80% of maximum allowable quantity to provide for a safe margin of error so the Placard exception in 49 CFR 172.504 (c) applies. By limiting the total HAZMAT gross weight to **less than 1,001 lbs.** (total aggregate gross weight), the exception applies and a CDL driver with HAZMAT endorsement or Placards are **not** required for transporting the lower limits of HAZMAT.

Refer to HAZMAT guide in the National NFES catalog for additional information and Waybill example.

INSTRUCTIONS FOR SHIPPING INTERNAL

COMBUSTION POWERED ENGINE EQUIPMENT & FUEL CONTAINERS

All internal combustion engines must be operated until starved of fuel. Engine fuel lines and fuel containers, **must be completely EMPTY** of all fuel and purged properly before shipping. No fuel or flammable liquids are to be transported to the cache in any form, except propane. This includes gasoline, gasohol, kerosene, diesel, Avgas, Coleman fuel, etc.

- All fuel containers must be emptied and purged before shipping
- A container with punctures or ineffective seals is not to be returned to the cache

PREFERRED MEANS OF PURGING IS MECHANICAL: (Liquid purge is no longer recommended)

- Drain fuel tank or container into appropriate container for Incident/customer use or disposal
- Operate engine until starved of fuel
- Vent tank or container until dry if possible or as long as possible to eliminate most of the fumes. When dry, recap the tank or container. Tag all items that have been drained and purged
- **Purging fluid, NFES 0700, is not available by local purchase or from the cache system**

When transporting an item with an internal combustion engine equipped with a battery, the battery cables must be disconnected and secured to prevent sparks. This also applies to radio battery cables.

Generator fuel lines must be turned off before moving, even when moving around fire camp. If this is not done, damage to the engine may occur. Generators should be serviced after 50 hours of running time.

Engines or fuel containers that have been used on the incident should be shipped in an open-air, non-enclosed vehicle if possible. It is okay but not recommended to transport in an enclosed van. Ensure all empty containers are shipped in a secure, upright position and all lids are tightly closed.

All hazardous materials being shipped must be correctly identified on a Waybill per 49 CFR. See Waybill Example for correct HAZMAT DECLARATION INFORMATION from an Incident, on page 40.

All internal combustion equipment and fuel containers must be drained and mechanically purged, declared on shipping papers and a copy provided to the driver. Drivers should be present when the vehicle is loaded. It is the driver's responsibility to ensure a vehicle is properly loaded.

<p>❖ Absolutely no Red Bio-Hazard Disposal Bags will be accepted or returned to the cache. The Medical Unit at the Incident should handle all bio-hazards.</p>
--

These instructions are to be enclosed in all kits with internal combustion powered equipment where it can easily be referred to, such as on the inside of the box lid or flap.

By Request	CATALOG, Billings Fire Cache: Fire supplies, policies & procedures	BK	

KITS

The Kit Section of this catalog only includes packing lists for kits that are built and refurbished at Billings Fire Cache. For other kit lists, refer to the NWCG NFES Catalog. Kits are also listed in the Alphabetical and Numeric Sections of this catalog. **Individual kit components are generally not available outside of the kits.**

All kits containing hazardous materials will be appropriately labeled and identified. SDS's will be provided when required. All hazardous materials will be removed from kits that are shipped by commercial air freight.

All kits built at BFK follow National Fire Equipment Standards (NFES). The national standard kit packing lists have been developed with input from field user groups and have been identified as National Standard kits. This means that the kit is stocked by an NFES cache and is used on an interagency basis. All National standard kits will have a review year and change year indicated in the NWCG NFES catalog on the kit item page. Kits will not be changed for any reason except for safety reasons between the scheduled change years. Comments or suggestions for kits, including any ideas for new kits, should be forwarded to the closest geographical NFES Cache Manager. Comments for existing kits can include suggestions for additions or deletions.

Note that some kits in stock may not meet the current standards since they were built to previous kit standards; they will be updated to the current kit standards on an attrition basis or upon return from incidents. A packing list is enclosed with each kit that reflects all of the component items. If there are discrepancies, contact the shipping cache or complete the evaluation form and return to the cache.

The Kit committee recommended changes for the 2016 fire season for some kits and components. Normally caches have two years to implement changes after the kit committee makes changes. The new items and other changes can cost a large amount of money and have storage implications so changes may not be implemented immediately.

Kit Changes for 2016:

0260 Pump Tool Roll
0390 Finance Kit
0910 Logistics Kit
1040 Crash Rescue Kit

Kit Changes for 2015:

082069 Cache Van
000970 Fence Kit

Kits built and refurbished at Billings Fire Cache:

NFES #	KIT DESCRIPTION	BFK Kits being updated per National Kit Committee
001050	Belt Weather Kit	04/2010

NFES 1050 – BELT WEATHER KIT

QTY U/I NFES DESCRIPTION

1	EA	1155	ANEMOMETER, Hand, Wind Speed Indicator
1	EA	1160	BOARD, Writing
1	EA	1157	BOTTLE, Water, 1¼ oz. Plastic
1	EA	1154	CASE, Belt Weather Kit
1	EA	1814	COMPASS, Smoke Chaser
1	PD	1159	FORM, OF-251, Mobile Fire Weather Observers Record
1	EA	1178	FORM, B-O-6A, Relative Humidity & Dew Point Table
1	EA	1179	FORM, B-O-6B, Relative Humidity & Dew Point Table
1	EA	1182	FORM, B-O-6C, Relative Humidity & Dew Point Table
1	EA	1185	FORM, B-O-6D, Relative Humidity & Dew Point Table
1	EA	2155	FORM, B-O-6E, Relative Humidity & Dew Point Table
1	PD	0448	PAD, Writing, DI-5A or equal
2	EA	1002	PENCIL, Wooden, #2
1	EA	1156	PSYCHROMETER, Sling w/ Humidity Calculator

NFES 0340 – CHAIN SAW KIT

<u>QTY</u>	<u>U/I</u>	<u>NFES</u>	<u>DESCRIPTION</u>
1	EA	0383	AXE, 3-5lb, 26" Straight Handle w/Sheath
1	EA	0645	CARTON, Fiberboard, 42" x 13 ½" x 14"
1	EA	0159	Chain Saw, 20-24" Bar, w/Guard
1	PR	0045	CHAPS, Protective, Summer Weight, 32" Long
1	PR	0741	CONTAINER, Fuel/Oil, 2-Compartment
10	PG	1027	EARPLUGS, Foam, Disposable (1PR=1PG)
2	PR	0318	GOGGLES, UVEX, Clear Lens
1	KT	0342	KIT, Tool Roll, Chain Saw
6	EA	3444	OIL, 2-cycle, Mix Size for 1 Gallon Fuel Mix
2	QT	1869	OIL, Bar and Chain
1	EA	0744	PACKSACK, Waterproof, w/Straps
1	LB	3309	RAG, Wiping
10	EA	0216	TAG, Shipping (Blank)
2	EA	0515	WEDGE, Felling, 6"
2	EA	0516	WEDGE, Felling, 8", Rifled
2	EA	0884	WEDGE, Felling, 8", Textured/Smooth
2	EA	2725	WEDGE, Plastic, Felling, 12" x 1 1/8" x 3 ¼"

NFES 0342 - CHAIN SAW TOOL ROLL KIT

<u>QTY</u>	<u>U/I</u>	<u>NFES</u>	<u>DESCRIPTION</u>
1	EA	0347	CASE, Chain Saw Tool Roll
1	EA	0351	FILE, Mill, 8", Bastard
2	EA	0345	FILE, Round, 7/32" x 8", Chain Saw
1	SE	0061	GUIDE, File, 7/32", w/File & Handle
1	EA	0063	HANDLE, File, for 8"-14" Files
1	EA	0344	PLUG, Spark (Saw Specific)
1	EA	0256	SCREWDRIVER, Flat Tip, 2"
1	EA	0346	TOOL, Combination, Chain Saw or Pump
1	EA	0336	WRENCH, Torque

NFES 0480 – COFFEE HEATING KIT

<u>QTY</u>	<u>U/I</u>	<u>NFES</u>	<u>DESCRIPTION</u>
5	EA	3300	BAG, Garbage Can Liner, Plastic, 30 GL
1	EA	0482	BASKET, Filter, w/Handles
1	EA	0500	CARTON, Fiberboard, 22" x 22" x 36"
8	LB	0496	COFFEE, Drip, approx. 1-2 lb. cans
1	EA	1083	COVER, Coffee Urn
100	PG	0499	CREAM, Substitute, Individual Packet
1	BX	0465	CUP, Paper
2	EA	0676	FAUCET, Coffee Urn, Chrome, ½" NPSH
50	EA	0483	FILTERS, Paper, Coffee Basket, 23" x 9"
1	EA	0471	FUEL LINE ASSEMBLY (see components below)
1	EA	0478	IGNITER
1	EA	1181	INSTRUCTIONS, Coffee Kit
1	PR	0494	MITTS, Oven, 14" Long
1	EA	0331	OPENER, Can, Wing Handle
1	EA	0487	PAIL, Pouring, 12 QT, Stainless Steel
1	EA	0485	RING, Seating (used to hold coffee urn)
100	EA	0497	SPOON, Plastic, 5" (100/CS)
1	EA	0484	STAND, Coffee Urn, Ring Type
1	EA	0488	STOVE, Water Heater, Single Burner
150	PG	0498	SUGAR, Granulated, Individual Packet
50	PG	0381	SUGAR, Substitute, Individual Packet
1	EA	0481	URN, Coffee, 20 GL, Stainless Steel
1	EA	0490	WINDSHIELD, Stove, Water Heater
2	EA	0473	WRENCH, Adjustable, 10"

<u>QTY</u>	<u>U/I</u>	<u>NFES</u>	<u>DESCRIPTION</u>
1	EA	0471	FUEL LINE ASSEMBLY

2	EA	0002	FITTINGS, Double Male, 232 L9/16-18LH, Brass Union
1	EA	0493	HOSE, Flex, w/Fittings, 12", Metal Clad
1	EA	0492	HOSE, Flex, w/Fittings, 72"
1	EA	0930	REGULATOR, Pressure, Propane
1	EA	0289	VALVE, Shut Off, Propane, Needle Valve

NFES 0390 – FINANCE SECTION KIT

<u>QTY</u>	<u>U/I</u>	<u>NFES</u>	<u>DESCRIPTION</u>
1	PG	0030	BATTERY, AA
1	PG	0033	BATTERY, D
2	EA	0790	BOX, Interfile, Legal and Letter Size
1	BG	0776	CLIP, Paper (approx. 100 bg/bx)
2	BX	0784	CLIP, Binder
1	EA	0288	CLOCK, Digital w/Alarm
1	EA	1065	CONTAINER, Kit item only (for kit packing)
50	EA	0766	ENVELOPE, Brown, Plain, 9¼" x 12"
25	BK	0891	FORM, SF-261, Crew Time Report

bing Maps

551 Northview Dr, Billings, MT 59105 896.2870

190-27th St	exit 450
Towards Airport	
To Hwy 3 & right	
To Rintop Dr & left	
Heights Main St	
to Airport to Rintop Dr & right	

On the go? Use m.bing.com to find maps, directions, businesses, and more

Alternate route: From I 90 take exit 452 at Lockwood. Head towards town & stay in the right hand lane

Turn right going past the Fairgrounds. Get in the left lane and follow Main St to east Airport Rd

Turn left or west (by the Cenex) and follow road until you see the Airport Business Park sign.

Follow Rintop for about 1 mile until you see the Fire Cache sign
