Description:

Summary of Analysis *

Area Unique Identifier: Sheep Mountain, MT-020-040

Summary

Results of analysis:

This unit is not recommended for LWC as it does not meet the naturalness criteria due to many human activities and uses.

(Note: explain the inventory findings for the entirety of the inventory unit. When an LWC has been identified that is smaller than the size of the total inventory unit, explain why certain portions of the inventory unit are not included in the LWC (e.g. the inventory found that certain parts lacked naturalness).

- 1. Does the area meet any of the size requirements? Yes No
- 2. Does the area appear to be natural? Yes No N/A
- 3. Does the area offer outstanding opportunities for solitude or a primitive and unconfined type of recreation? Yes No N/A
- 4. Does the area have supplemental values? Yes No N/A

Highlight one:

The area, or a portion of the area, has wilderness characteristics and is identified as Land with Wilderness Characteristics (LWC).

The area does not have wilderness characteristics. The unit does not provide outstanding solitude or naturalness due to the human caused activities and structures including; roads, powerlines, pipelines. Additionally the unit consists of crested wheatgrass which is not a native grass, diminishing the naturalness of the unit.
