Summary

Results of analysis:

This unit is not recommended for LWC even though it does meet the size and naturalness criteria, it does not provide outstanding opportunities for solitude or primitive or confined recreation activities.

(Note: explain the inventory findings for the entirety of the inventory unit. When an LWC has been identified that is smaller than the size of the total inventory unit, explain why certain portions of the inventory unit are not included in the LWC (e.g. the inventory found that certain parts lacked naturalness).

Highlight one:

The area, or a portion of the area, has wilderness characteristics and is identified as Land with Wilderness Characteristics (LWC).

The area does not have wilderness characteristics. Due to the close proximity to the town of Broadus, MT the surrounding area has been altered by human caused activities such as farming, irrigation, roads, homes, etc. diminishing the solitude and primitive values of the area.
