MT100								

In order to report progress on backlogged permits, please fill in the number of permits which originally expired in 1999, 2000, 2001, 2002, 2003, 2004 or 2005 and were fully processed in FY 2005 in the appropriate column. Any permits which would have expired in 2006 or beyond, but were fully processed in FY 2005 would be entered in the column labeled "Future Permits". These may have been processed because of a transfer application, land health standard determination, etc.
