

ACKNOWLEDGMENTS

The Pryor Mountain Wild Horse Range Survey and Assessment was completed with the assistance of many individuals. Thanks to those who worked long hours, often under less than ideal conditions, for their assistance in completing the field inventory.

Team members included:

Mandie Reed, Range Management Specialist, NRCS, Harlowton, Montana
David Spengler, Soil Conservationist, NRCS, Helena, Montana
Greg Evertz, Soil Conservationist, NRCS, Joliet, Montana
Jamie Wages, Range Technician (volunteer), BLM, Britton Springs, Wyoming
William Murray, Range Management Specialist, NRCS, Sheridan, Montana
Joe Fidel, Resource Conservationist, NRCS, Bozeman, Montana
Stephanie Sever, Range Management Specialist Trainee, NRCS, Bozeman, Montana

The leadership of our field survey team leaders was invaluable. Thanks to Sue Noggles who was responsible for field data collection in the National Park and Forest Service inventory units, Barb Landgraf-Gibbons in the Burnt Timber and Penn's Cabin units, and Matt Ricketts in the Britton Springs and Big Coulee units. Matt Ricketts also served as project coordinator.

Thank you to Barb Landgraf-Gibbons, Sue Noggles, Matt Ricketts, and Melissa Esser, BLM (Stallions sparring) for the beautiful photography.

Peter Husby, NRCS state biologist, and Matt Ricketts provided plant identification and cataloguing expertise that was greatly appreciated. Dr. Carl Wambolt, MSU professor of range science, assisted with positive identification of sagebrush subspecies.

The orientation and logistics assistance from Linda Coates-Markle, Larry Padden, David Jaynes, and Sandy Brooks of the BLM, Kim Reid of the USFS, and various USGS and NPS employees was greatly appreciated. Thank you to Sheila Cain and Randy Schardt of the BLM for the fine cartographic work and patience during the map making process.

The support and patience of Dennis Loreth, NRCS assistant state conservationist, and Dave White, NRCS state conservationist, in completing the project was very much appreciated. Thank you to Tasha Gibby, NRCS public affairs, Tom Pick, NRCS water quality specialist, and Kathy Ives, BLM publications, for assistance with formatting and publication. A special thank you goes to Stephanie Sever for her dedicated editorial and data compilation assistance.
