

Travel Route Inventory

Single-lane Gravel Road Near Texas Hill

Cattle Trail in the Salt Playa Area

Inventory

It is the goal of the transportation route inventory to identify all existing routes within special designations to enable the CFO to formulate management prescriptions and decisions for the RMP. As part of the RMP revision process, 17 special designations, either existing or nominated, within the CFO have been inventoried for existing transportation routes.

Now that this information has been gathered, the BLM can assign travel designations to routes and areas.

Hackberry Off-Highway Vehicle Area

Terrestrial Road of Bedrock in the Mudgetts / Dark Canyon Area
