I would like to make you aware that I support the Copper Flat Mine project in New Mexico, both personally and as a Principal of John Shomaker & Associates, Inc.

Our firm has worked closely on this project for a number of years and the economic benefits of this project allowed us to hire additional staff.

Extractive industries, whether mining, or oil and gas, provide substantial economic benefits to the State of New Mexico.

The project has little impact on water resources in the area and the use of water for the mine is properly administered through the New Mexico Office of the State Engineer. Water rights are in place for proposed diversions for the project.

The Copper Flat mine will employ a relatively large number of local workers thereby bringing a long-term boost to the local economy. The project will provide positive impacts from a social justice standpoint in that high paying jobs will be available to local families thereby increasing their quality of life.

As a fourth generation New Mexican, I look forward to continuing to work on this project and be a part of a project that helps all New Mexicans.

Thanks, Roger Peery
