I am a third generation resident and property owner in Ex 6 [REDACTED]. My wife (Cami Cosper) and I support the proposed copper mine at Copper Flats. I have reviewed the EIS and found it adequate in disclosing the potential effects of the project. As a professional wildlife biologist and amateur archeologist I was especially interested in the wildlife analysis and consultation, and the SHPO report, both of which are thorough and well written. I carefully reviewed the hydrological models and analysis and believe you used the best available science and disclosed any potential effects to my satisfaction.

Thanks Larry D. Cosper
