Please see attached letters to the editor published in local papers.

I also made a complaint/comment on the NMISC Draft Regional Water Plan which indicates a violation of its section 5.1, p 6, if about 2,000 ac-ft/yr of flow to the Rio Grande as reported in the DEIS, is stopped and not made up as required by state water law. Also there is no report about the hazard found at the tailings dam as seen in the ISC water plan at table 5.7, which was reported by the Corps of Engineers in 2014, to be a significant hazard.

I also dislike the BLM statement that the OSE "will" give THEMAC 13,000 ac-ft of water which it does not have nor is provable/available within the basin. If this statement is true then there has been an illegal bias from the OSE while a legal challenge is being heard.
