I truly believe THEMAC is a very responsible Corporation. THEMAC has taken the time to have meetings to update and educate the public, and explain what they are doing. From an environmental standpoint and maintenance standpoint I believe they are taking precautions to the best of today's regulations. I also believe the time has come to reevaluate the out of date people who are using old information to stop progress. In Sierra County you have Citizens Against Virtually Everything (CAVE People), Ron Fenn and his crusaders, and the corporate commercial religious organizations who think THEMAC is scaring Mother Earth. If these people took a look they would see the earth is already scared. The time has come to grant THEMAC their permits so that they can proceed.

I'm writing this on the experience I have had working as a survey engineer working on large construction projects such as steel mills, nuclear power plants, paper mills, and doing maintenance for 20 years. I'm also an environmentalist that has stood up against polluting our environment. Opening this mine will help Sierra County economically, and will also bring in a good neighbor to help our youth learn work skills to help them through life.

Sincerely, Ted Kuzdrowski,

Ex 6 [REDACTED]
