Dear Mr. Haywood,

I do not support New Mexico Copper Corporation's plan to re-open the Copper Flat Mine in Sierra County, New Mexico.

This project will not provide much needed employment and it will also not bring work to many supporting sectors for a positive impact throughout the state. The United States needs responsible domestic production of natural resources. The Copper Flat mine will not produce copper and other valuable metals right here in New Mexico and with the proper federal and state regulations in place to ensure protection of workers and the environment.

Furthermore, I have had the opportunity to read the Draft EIS prepared by the BLM and feel that this document does not do a good job in analyzing the project from an environmental perspective, misidentifies the issues, and ignores the groundwork for necessary environmental protection measures. I appreciate the fact the BLM will eventually be thorough in their work and provide time for the public review process.

I ask that you work through the EIS process efficiently and without delay so that we can welcome responsible industry, economic development and jobs to New Mexico.

Sincerely,
bill bussmann
