

BLM MISSION...

To sustain the health, diversity, and productivity of the public land for the use and enjoyment of present and future generations.

NLCS MISSION...

The PTNM is a unit of the BLM National Landscape Conservation System (NLCS). The mission of the NLCS is to conserve, protect, and restore Nationally-significant landscapes that are recognized for their outstanding cultural, ecological, and scientific values. The PTNM was designated in order to conserve, protect, and enhance the unique and Nationally-important paleontological, scientific, educational, scenic, and recreational resources and values of the public land.

OUR VISION...

The Prehistoric Trackways National Monument preserves a moment in time when the world was poised on the brink of cataclysmic change that would usher in the era of the dinosaurs. Our vision is to tell this story to the Nation through education and interpretation, and through scientific research. The BLM will maintain the rugged and scenic setting while providing opportunities for recreationists to enjoy these lands now, and for future generations, while ensuring the sustainability and protection of the paleontological resources. We will work collaboratively with partners to optimize Monument management which will enhance our ability to serve the public and meet the needs of the Monument resources, objects, and values.
