To Whom It May Concern,

I am a resident in Denton, Texas and just found out that you plan to auction-off public land next to our drinking water supply (Lewisville Lake) to the highest bidding oil & gas companies for fracking natural gas.

I am very much against fracking next to our drinking water supply. Not only can the trucks that carry the fracking fluid have an accident and release the toxic chemicals into the lake, but the whole process is dangerous. The injection well can blow, the gas well can leak, numerous things can go wrong. And the clean up of millions of people's drinking water won't be easy or cheap.

Clean water is our right; please do not allow this public land for fracking auction take place.
Thank you.

A Very Concerned Citizen,

Madeline N. Treadaway
