

To whom it concerns,

Feb 9, 2016

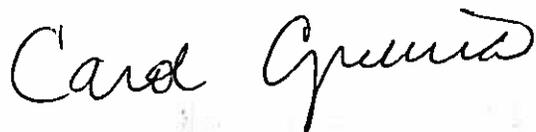

I am vehemently opposed to fracking anywhere around/near Lewisville Lake in Texas!

Lake Lewisville is a large source of water for all the residents in DFW. Currently there is trouble with the dam, it is corroding and unstable. I don't think that the dam and the lake can withstand the added stress of fracking.

I read that this was first discussed in November, but not one from my neighborhood found out about it until this week! And now there is a deadline to respond with opposition by Feb 19<sup>th</sup>? This subject certainly was not publicized, and appears to have been hidden, and now a fast approaching deadline to oppose? This seems suspicious and wrong!

We cannot afford to have fracking anywhere near Lewisville Lake! Our water source is very important to safe guard for not only those in the area, but ALL of the people in the Dallas/ Fort Worth area!! Find another area that is not in the vicinity of a lake providing water to a large community. Please listen to our concerns, and find another area!

Sincerely,

Carol Greenia
