Re: Protest of Drilling concerns at Lake Lewisville

I am writing as a concerned citizen of Highland Village Texas to protest the auctioning off of drilling rights for the 259 acres of land near Hickory Creek.

Lake Lewisville provides drinking water for thousands of people in the area and allowing fracking below the lake will put everyone at risk. There is a current investigation that has uncovered numerous violations by drillers in other areas of the state that is contaminating drinking water.

Not only are we concerned with the safety of the water supply, but we are also concerned about the seismic activity as a result of fracking. The Lewisville Dam is already damaged and the resulting earthquakes will cause further damage and cause a breach.

The City of Highland Village has joined in this protest on behalf of all of their citizens, so this protest should be taken seriously.

I understand that this office will forward my protest to the appropriate director.
