NOTE TO MAP USERS

The surface and minerals management status overprints are published as general planning and management tools. Some of the lands, surface and mineral rights, may have been shown as public lands due to the lack of information available to BLM with respect to the nature of acquisition by BLM. The official responsible for the respective official in the State or Federal Management or other responsible Federal agencies should be checked for up-to-date status on any specific land. Inadequacies in the BLM maps should be reported to the respective Bureau of Land Management offices from which the maps were obtained.

PUBLIC ACCESS

Roads crossing public lands may be traveled by the public unless closed by signing or notice by the land management agency. Public lands inventoried by private lands may not have public access. Permission is required from the private landowner to cross private land, unless access is provided by a Federal, State or County road, or a BLM road with legal access.
