**NOTE TO MAP USERS**

The surface and minerals management status overlays are published as general planning and management tools. Some of the surface and mineral rights may have been shown as patented lands due to the lack of information available in BLM files with respect to the nature of acquisition. No warranty is made by the BLM for use of the map for purposes not intended by BLM. The official land records in the respective offices of the Bureau of Land Management or other responsible Federal agencies should be checked for up-to-date status on any specific tract of land. Inquiries in the BLM maps should be reported to the respective Bureau of Land Management offices from which the maps were obtained.

**PUBLIC ACCESS**

Roads crossing public lands may be traveled by the public unless closed by signs or notice by the land management agency. Public lands interest by private lands may not have public access. Permission is provided from the private landowner to cross private land, unless access is prohibited by Federal, State or County road, or a BLM road with legal access.
