It is the mission of the Bureau of Land Management to sustain the health, diversity, and productivity of the public lands for the use and enjoyment of present and future generations.

ROUTE COMPARISON TABLE

The following table provides route by route designations to allow for comparison of the alternatives presented in Environmental Assessment #DOI-BLM-NM-F010-2013-0197-EA for the Glade Run

Recreation Area (GRRRA) Recreation and Travel Management Plan (R&TMP). Please consult the environmental assessment for detailed information on travel management planning for detailed information about the alternatives.

How to Read this Table

This table provides a summary of the Route Evaluation Forms completed for each route within the GRRRA. In addition to general information such as the unique identifying number (unique ID), mileage, function class, and maintenance levels; the table provides a comparison of how each routes designation varies by alternative. The Route Notes column provides supplementary information about each route and other resources that could overlap the routes course. Some resources are not listed due to their sensitive nature. This supplemental material only provides information regarding the presence or absence of a resource and does not infer any level of impact to the resource.
