Complete: For acquisition projects, completed reflects those projects where the property has been purchased, title has transferred to the United States, and financial closeout of the project is complete. However, in some cases, final title acceptance may still be pending on completed acquisitions. For all other categories, completed indicates that both the project work and financial reconciliation for project closeout have been completed.

In Process: Projects in process may be in any of the following stages: Approved but pending activity until notice is provided that there are sufficient funds in the Special Account, approval of the project workplan is received, and/or execution of the appropriate financial instrument to provide project funds; conditions to expend funds have been met, funding has been provided, and work on the project is underway; work on the project is substantially or fully complete but final financial reconciliation for project closeout is pending

Terminated: Acquisition projects may be terminated due to valuation issues, withdrawal of the property by the seller, or unacceptable property or title issues. Projects in all categories may be terminated for a variety of factors, including failure to adhere to funding availability time lines, inability to make substantial progress, or a determination that a project is no longer physically or financially viable.
