Use limitations

The BLM assumes no responsibility for errors or omissions. No warranty is made by the BLM as to the accuracy, reliability, or completeness of these data for individual use or aggregate use with other data; nor shall the act of distribution to contractors, partners, or beyond, constitute any such warranty for individual or aggregate data use with other data. Although these data have been processed successfully on computers of BLM, no warranty, expressed or implied, is made by BLM regarding the use of these data on any other system, or for general or scientific purposes, nor does the fact of distribution constitute or imply any such warranty. In no event shall the BLM have any liability whatsoever for payment of any consequential, incidental, indirect, special, or tort damages of any kind, including, but not limited to, any loss of profits arising out of the use or reliance on the geographic data or arising out of the delivery, installation, operation, or support by BLM.

Resource Constraints ▼► Constraints

Limitations of use

The BLM assumes no responsibility for errors or omissions. No warranty is made by the BLM as to the accuracy, reliability, or completeness of these data for individual use or aggregate use with other data; nor shall the act of distribution to contractors, partners, or beyond, constitute any such warranty for individual or aggregate data use with other data. Although these data have been processed successfully on computers of BLM, no warranty, expressed or implied, is made by BLM regarding the use of these data on any other system, or for general or scientific purposes, nor does the fact of distribution constitute or imply any such warranty. In no event shall the BLM have any liability whatsoever for payment of any consequential, incidental, indirect, special, or tort damages of any kind, including, but not limited to, any loss of profits arising out of the use or reliance on the geographic data or arising out of the delivery, installation, operation, or support by BLM

Constraints

Limitations of use

NON-BLM DATA - FOR INTERNAL USE ONLY - NOT FOR DISTRIBUTION. These data are available to appropriate Bureau of Land Management (BLM) staff, contractors, and partners. All other requests for this data will be referred to the source agency. This data might contain sensitive information and can be released by the source agency, subject to FOIA limitations.

Limitations of use

NON-BLM DATA – USE IS SUBJECT TO DATA SHARING AGREEMENT. All use must conform to the restrictions placed on the User by the Data Sharing Agreement on file in Records Management and as follows: Internal Planning Use. Users will take all measures to ensure this data is protected from disclosure. Users assume the entire risk associated with use of this data. The BLM has no liability for unintentional disclosure, or for any use or misuse of this data. Users bear all responsibility in determining the fitness of this data for the intended use. Users must consider the following: time sensitivity of the data; spatial differences in measure, projection, or accuracy; differences in terminology, description, or place names. External source metadata might not be complete, reliable, or observe BLM, Federal Geographic Data Committee or International Standards Organization standards. In the event of highly sensitive data the source organization might have modified the data for release. Users will assume that no attempts have been made to verify, correct, or complete the source metadata except where noted in a process step – the data and metadata

are “as is” from the source. The BLM attempts to ensure that the external data in corporate holdings is current. Users are responsible for verifying the timeliness of data. The BLM is not responsible for maintenance or update, and offers no warranty of data. Users agree not to misrepresent the data, nor to imply that changes made were approved or endorsed by the BLM. Users will cite this data as source data in any products derived from this data. Users that modify data are obligated to describe in a process step the modifications made. The source organization might update this data without notification to users. Users will accept the data as is, with all faults
