

SPECIAL STIPULATIONS

N-79742

(Source: Kane Springs Groundwater Development Project EIS)

- 1) If previously unidentified cultural resources (including human remains) are discovered, the procedures outlined in State Protocol Agreement, Section VIII (Discovery Situations) would be adhered to. Under the agreement, all related construction activities would cease within 100 meters of the find, and the LCWD representative would notify the BLM authorized officer. The BLM, in coordination with the SHPO, interested persons and Tribal representatives, would determine if construction activities can proceed or if mitigation is required. If mitigation is required, the BLM (in consultation with the SHPO, interested persons and Tribal representatives) would notify LCWD of the need for mitigation, and additional mitigation measures would be implemented. The BLM would ensure that reports of mitigation efforts for discovery situations are completed in a timely manner and conform to the Department of the Interior's Formal Standards for Final Reports of Data Recovery Program (42 FR 5377-79). Activities may resume after the BLM notifies the LCWD that the mitigation process is complete.
- 2) To Restrict OHV use in unauthorized areas, restrictive barriers would be used to limit public access of new maintenance roads adjacent to the Wilderness. Barrier control methods would be coordinated with the landowner/manager and may include locked gates and fencing.
