Subject: Water Pipeline

Attn: Penny Woods

In reference to a recent article in the Review Journal on the water pipeline proposal.

Kindly consider to not rob Peter to pay Paul or clearer defined please do not jeopardize or compromise our Northern neighbors lifestyle to satisfy and provide Southern Nevada with an adequate supply.

The pipeline is not a bad idea but the source and direction is;

A greater source of water approximately the same distance away would be the Pacific Ocean. It would require desalinization and some agreement with California but the rewards are much greater.

Considering last November Lake Mead was at a all time low the following should be considered;

During the interim of this Pacific pipeline process a temporary restriction on the number of building permits should be allocated and regulated by maintaining a suitable water level at Lake Mead.

We would appreciate your response and thoughts in a reasonable time period.

Thank you.

Respectfully,

Robert Chars
