Subject: SWNA comments

Dear Ms. Dow,

The comment e-mail does not work, so I am sending these comments to you. I have phoned several times for a correct e-mail, but no one is home! I was referred to you and left a message. I know of many friends who are trying to comment. I hope you will extend the deadline.

I am submitting public comments re the for the SNWA's application for a pipeline from the Snake Valley. As a resident of the Wasatch Front, I am horrified at the possible effects of draining the water. We should know by now that aquifers are not easily replaceable -- especially in a desert environment. As a former Californian, I watched in horror what happened to the Owens Valley when its water was pumped for Los Angeles' use. Alkali dust storms of lingering proportions were just one thing. I do not want this to happen in Utah and Nevada. And I certainly DO NOT believe the SNWA's assertions that it won't.

Please take future generations into account and leave the water where it is.

Thank you,

Chris Simon
