Subject Pipeline Plans

Dear Penny Woods,

Thank you and the Nevada Water authorities for the efforts to find alternative water sources for the human population of Las Vegas. Please do not be discouraged, by tax dollar sucking leeches, such as the Center for Biological Diversity. Let us make certain that the interests people of Las Vegas considered in opposition those few, who's values frogs, spiders, broken tumble weeds etc. over human life. Perhaps it need to be looked who is supporting these anti people organizations. People I know and I, hate to see that our tax dollars are put to be used against us, by these fake-scientific leeches. Because we supposed to live in a democratic society, I have no objection to listen to them as long as they use a taxed donations to support themselves. I would be surprised very much if they outnumber us water consumers..

We are already have drip irrigation systems, AstroTurf and rock covered yards. We are concerned about the water problems of southern Nevada and did something about it. We do not want abandon our homes because some loud bleeding hart lunatics, I hope that our democratic system defends us against these "environmental" terrorists.

Sincerely,

Imre Fodor
