Subject blm nevada groundwater projects deis - blm is a venal,
vicious agency that needs to be shut down

History:  This message has been replied to.

water pipeline and power line through clark, lincoln and white pine counties - thne a merican public does not need or want this construction to take place. there is no need for further development in this area. is there some political connection with harry reid going on with all this developmnet which is ruining the natural land.

i would like an investigation of this please by attorney general of usa. i also see a decided rush to take all open water away from birds and animals, which need the water to live and i fully am against this. mankind is greed personified and needs to think about other creaturs that needs to stay alive. the management at blm is so venal, vicious and disgusting that they take away all water from wild horses and then try tokill them. .i am definitely against that bv this vicious, degenrate agency.

please send me a copy of the deis to 2 glenway flemington nj 08822. thanks. i want to comment in detail on this crappy project.

some waters of nevada need to belong to birds and animals or are you signing them a death warrant? jeanpublic@yahoo.com
