Subject water extractions from Nevada and Utah

I do not believe it is the best interests of the people, the animals or the environment for the Las Vegas pipeline proposed.

If Las Vegas needs more water, and are using their allotment from the Colorado river, they should spend all the money for this bad idea, on a system that recycles their waste water into a potable water supply, from their existing supply.

Do not continue on this path of waste for the area affected.

Thank you
