Subject

I am a citizen of Utah. I am opposed to the proposed drilling of over 200 wells and the shipping of water via underground pipelines from our state to yours. It is time to look at how wise it is to increase populations in areas that can not sustain them at the expense of the environment. It is time to look at alternative forms of urban and water development and conservation as opposed to going down the same environmentally destructive roads. I feel this pipeline project will make the already fragile Utah lands barren and useless and affect, once again, the hunting and water viability of Native American population in the area. Count my vote as a NO for this project.
