Notes:

This chart is a non-comprehensive summary of communications with tribes. This chart is intended to provide an overview of the type and frequency of communications with Tribes and is not intended to be a comprehensive report of all communication or consultation with these Tribes. Furthermore, tribal consultation is ongoing. A comprehensive record of tribal communications and tribal consultation is available in the Administrative Record. Some of those communications are confidential and cannot be disclosed to the public. Telephone calls and e-mail communications are an integral part of information sharing, tribal outreach, and tribal consultation. These types of communication are also used to facilitate and organize tribal consultation. These forms of communication have also been excluded from this table, due to size, but are included in the Administrative Record.
