Subject: clark,lincoln and white pine counties groundwater development project feis - takign all the water for those with power - leaving animals, birds without any water, and people in counties without political power

i do not approve of this plan. it is true that the us bureau of land management is a venal, vicious agency with absolutely no concern at any time for the environment or for people's health. i have read the executive summary. it is as usual blm trash. blm has proven this by the way they have in this plan killed the wild horses in the silver king and eagle horse management areas. they corral them in 100 degree heat and then send these horses into slavery, where they end up in slaughterhouses to die brutal deaths. i and animreject this plan in full and totally oppose it. let the counties make their own water, not steal others.

i oppose taking groundwater from east nevada and believe this is another stupid useless wasteful govt decision. some pol is lookign to make out on it. this stealing of water is negative for all birds and animals land people. us blm is a venal, vicious agency, and has a history of employees taking bribes. this agency and its personnel cannot be trusted by america anymore. they took all kinds of bribes from oil companies. it looks like the employees take care of themselves, not america. us blm is all about money and greed, not healthy living for all.

there is no "equity" to this project in any way. mitigation does not work and it is a fake to sop the public. the killing of antelope, elk, mule deer, bighorn sheep, owls, tortoise, grouse, rabbit, eagles, hawk, bats, monsters and bees is disgusting because their death will result from this plan. they all need water to live. you are robbing it from them. this agency proposes to remove 1300 acres of rangeland and that is a huge scar for nevada.

on pg es37, you are removing 3015 acrs of horse forage for this wasteful, stupid plan. clearly all cattle grazing should be immediately taken off this land. this is a selfish, robbing plan and it should be denied in full. blm needs to be investigated for criminality. this is my comment for the public record. jean public
