**Subject:** nevada groundwater projects - comment from the public

these projects are far too expensive. i believe so much water use is being used for not a helpful use. i see no provision to make sure animals get water - wildlife that is. i know the welfare cattle ranchers will make sure they get water for their cattle from ourland, but for all land the wildlife and birds need water too. you need to see to protect them. far too often, the ranchers take all teh water, that is obscene. this is my comment for the public record. jean public
