Street Address (optional): \_\_\_\_\_

City/State/Zip (optional): \_\_\_\_\_

Email (optional): \_\_\_\_\_

(Please let us know if we can provide future mailings via email to conserve paper.)

**PLEASE CHECK YOUR AFFILIATION BELOW:**

\_\_\_\_\_ Individual (no affiliation)

\_\_\_\_\_ Citizen’s Group

\_\_\_\_\_ Private Organization

\_\_\_\_\_ Elected Representative

\_\_\_\_\_ Federal, State, or Local Government

\_\_\_\_\_ Regulatory Agency

\_\_\_\_\_ Tribe

You may provide written comments using this card, an email, or other written format. See reverse for commenting space and instructions for submitting comments.

We would like to hear from you about what issues you believe need to be addressed in the Livestock Grazing Plan Amendment. You may want to discuss particular places or resources. We have included a few questions that may help you formulate some comments. Even though we have included these questions, we welcome all of your comments and do not intend to limit your thoughts and/or suggestions.

- Which areas should or should not be available for livestock grazing and why?
- Considering the preliminary planning issues, are there other issues that should be considered?
- Are there guidelines and criteria the BLM should use to consider the amount of forage available for livestock?
- Are there changes in livestock grazing management you would like to see? Management includes items such as timing (i.e., season of use), pasture rotations, and range improvements (e.g., fences, water developments, and vegetation seedings).
- Should land treatments, such as vegetation seedings, be used to influence forage allocated for livestock?

*The BLM is an agency in the US Department of the Interior that manages approximately a quarter billion acres – more than any other Federal agency. This land, known as the National System of Public Lands, is primarily located in 12 Western states, including Alaska. Approximately 27 million acres of BLM administered lands make up the collection of National Conservation Lands, also known as the National Landscape Conservation System. These include BLM National Monuments, National Conservation Areas, Wilderness Areas, Wilderness Study Areas, and National Scenic and Historic Trails. The mission of the National Conservation Lands is to conserve, protect, and restore these nationally significant landscapes that are recognized for their outstanding cultural, ecological, and scientific values.*
