BUREAU OF LAND MANAGEMENT

Price Field Office  
125 South 600 West  
Price, Utah 84501

IN REPLY REFER TO:

3100  
(UT-G02000)

Memorandum

To: State Director, UT-922  
Attention: Terry Catlin and Teresa Thompson

From: Mike Stiewig, Field Manager

Subject: December Competitive Oil and Gas Lease Sale Parcel Recommendations

The Price Field Office has 53 parcels on the list for the December 2008 competitive oil and gas lease sale. The parcels were reviewed for land use plan conformance and NEPA adequacy as documented through completion of a Documentation of Land Use Plan Conformance and NEPA Adequacy (DNA) Worksheet attached to this Memorandum. Following is a summary of the determinations and recommendations:

### Parcels Recommended For Sale

U.S. Department of the Interior  
Utah Bureau of Land Management (BLM)

---

The signed CONCLUSION at the end of this worksheet is part of an interim step in the BLM's internal analysis process and does not constitute an appealable decision; however, it constitutes an administrative record to be provided as evidence in protest, appeals and legal procedures.

**A. BLM Office:** Price Field Office (LLUTG02000)

**Proposed Action Title:** December, 2008 Competitive Oil and Gas Lease Sale

**Location of Proposed Action:** Parcels are within Carbon and Emery Counties, Utah. Attachment 2 contains the legal description for these parcels.

**Description of the Proposed Action:** The Utah State Office proposes to offer the referenced parcels of land in Carbon and Emery Counties, Utah administered by the Price Field Office for oil and gas leasing in a competitive lease sale to be held in December 2008. These parcels were assessed for land use plan compliance and NEPA adequacy. Attachment 2 lists each parcel including special lease stipulations and lease notices. These parcels include public lands or lands in which the mineral estate is administered by the BLM. If a parcel of land is not purchased at the lease sale by competitive bidding, it may still be leased within two years after the initial offering under a current review of NEPA adequacy. A lease may be held for ten years, after which the lease expires unless oil or gas is produced in paying quantities. A producing lease can be held indefinitely by economic production.

Planning decisions place certain lands in a no leasing category. Most lands are leased with minor stipulations attached to the lease from the appropriate land use plan for the area. Some lands are leased with limited areas of no surface occupancy within the lease boundaries. Some lands are leased with no stipulations other than those found on the standard lease contract form. A lease grants the right to drill for oil and gas at some location on the lease.

A lessee must submit an Application for Permit to Drill (APD) (Form 3160-3) to the BLM for approval and must possess an approved APD prior to any surface disturbance in preparation for drilling. Any stipulations attached to the standard lease form must be complied with before an APD may be approved. Following BLM approval of an APD, a lessee may produce oil and gas from the well in a manner approved by BLM in the APD or in subsequent sundry notices. The operator must notify the appropriate authorized officer, 48 hours before starting any surface disturbing activity approved in the APD.

**B. Conformance with the Land Use Plan (LUP) and Related Subordinate Implementation Plans**

- Price Field Office Resource Management Plan (PRMP), 2008

The proposed action is in conformance with the applicable LUP because it is specifically provided for in the following LUP decisions:

The RMP describes specific lease stipulations (Appendix G of the PRMP) that apply to a variety of different resources including raptors, greater sage-grouse, and big game habitat, as well as program-related Best Management Practices (Appendix S of the PRMP) that may be applied on a case-by-case, site-specific basis to prevent, minimize, or mitigate resource impacts. Furthermore,

the PRMP states that BLM will, “Review all lease parcels prior to lease sale. If the PFO determines that new resource data information or circumstances relevant to the decision is available at the time of the lease review that warrants changing a leasing allocation or specific lease stipulation, the PFO will make appropriate changes through the plan maintenance or amendment process. The PFO may also apply appropriate conditions of approval at the permitting stage to ensure conformance with the LUP and all applicable law, regulation, and policies.” (Department of the Interior, 2008).

Several parcels given to the Price Field Office for review were within areas closed to leasing and were not included in the DNA. Those parcels are:

UT1108-347

UT1108-353

UT1108-354

**C. Identify the applicable NEPA document(s) and other related documents that cover the proposed action.**

- Price Field Office Resource Management Plan, 2008

**D. NEPA Adequacy Criteria**

**1. Is the current proposed action substantially the same action (or is a part of that action) as previously analyzed in the RMP?**

**Item 1: Yes for the following parcels:**

UT1108-058	UT1108-331	UT1108-343	UT1108-359
UT1108-319	UT1108-332	UT1108-344	UT1108-360
UT1108-320	UT1108-333	UT1108-345	UT1108-361
UT1108-321	UT1108-334	UT1108-346	UT1108-362
UT1108-322	UT1108-335	UT1108-348	UT1108-363
UT1108-323	UT1108-336	UT1108-349	UT1108-364
UT1108-324	UT1108-337	UT1108-350	UT1108-365
UT1108-325	UT1108-338	UT1108-351	UT1108-366
UT1108-326	UT1108-339	UT1108-352	UT1108-367
UT1108-327	UT1108-340	UT1108-355	UT1108-368
UT1108-328	UT1108-341	UT1108-356	UT1108-369
UT1108-329	UT1108-342	UT1108-357	UT1108-370
UT1108-330		UT1108-358	UT1108-371

**Item 1: Rationale for Yes:** The Price RMP analyzed the leasing of parcels for development of mineral resources.

**Item 1: No for the following parcel:**

None

**2. Is the range of alternatives analyzed in the existing NEPA document(s) appropriate with respect to the current proposed action, given current environmental concerns, interests, resource values, and circumstances?**

**Item 2: Yes for the following parcels:**

UT1108-058	UT1108-331	UT1108-343	UT1108-359
UT1108-319	UT1108-332	UT1108-344	UT1108-360
UT1108-320	UT1108-333	UT1108-345	UT1108-361
UT1108-321	UT1108-334	UT1108-346	UT1108-362
UT1108-322	UT1108-335	UT1108-348	UT1108-363
UT1108-323	UT1108-336	UT1108-349	UT1108-364
UT1108-324	UT1108-337	UT1108-350	UT1108-365
UT1108-325	UT1108-338	UT1108-351	UT1108-366
UT1108-326	UT1108-339	UT1108-352	UT1108-367
UT1108-327	UT1108-340	UT1108-355	UT1108-368
UT1108-328	UT1108-341	UT1108-356	UT1108-369
UT1108-329	UT1108-342	UT1108-357	UT1108-370
UT1108-330		UT1108-358	UT1108-371

**Item 2: Rationale for Yes:** The range of alternatives in the Price RMP are appropriate. In the RMP, BLM evaluated leasing and four other alternatives, to not allow leasing. The Decision Record of the 2008 Price RMP states that alternatives were considered throughout the document including no action, open to leasing, leasing with special stipulations, no surface occupancy and no leasing.

**Item 2: No for the following parcel:**

None

3. **Is existing analysis adequate in light of any new information or circumstances (including, for example, riparian proper functioning condition [PFC] reports; rangeland health standards assessments; Unified Watershed Assessment categorizations; inventory and monitoring data; most recent U.S. Fish and Wildlife Service lists of threatened, endangered, proposed, and candidate species; most recent BLM lists of sensitive species)? Can you reasonably conclude that all new information and all new circumstances are insignificant with regard to analysis of the proposed action?**

**Item 3: Yes for the following parcels:**

UT1108-058	UT1108-331	UT1108-343	UT1108-359
UT1108-319	UT1108-332	UT1108-344	UT1108-360
UT1108-320	UT1108-333	UT1108-345	UT1108-361
UT1108-321	UT1108-334	UT1108-346	UT1108-362
UT1108-322	UT1108-335	UT1108-348	UT1108-363
UT1108-323	UT1108-336	UT1108-349	UT1108-364
UT1108-324	UT1108-337	UT1108-350	UT1108-365
UT1108-325	UT1108-338	UT1108-351	UT1108-366
UT1108-326	UT1108-339	UT1108-352	UT1108-367
UT1108-327	UT1108-340	UT1108-355	UT1108-368
UT1108-328	UT1108-341	UT1108-356	UT1108-369
UT1108-329	UT1108-342	UT1108-357	UT1108-370
UT1108-330		UT1108-358	UT1108-371

**Item 3: Rationale for "Yes":** The Price RMP is adequate. The PRMP is the culmination of over five years of research, documentation, and discussion with environmental professionals, industry, and the public.

**Environmental Justice:** The ethnic composition and economic situation of residents of Carbon and Emery Counties indicate that no minority or low-income populations are experiencing disproportionately high or adverse effects from current management actions (2004 Draft RMP EIS, pg 3-62). Leasing would not adversely or disproportionately affect minority, low income or disadvantaged groups.

**Groundwater:** Groundwater quality for the land proposed for lease was analyzed in the original planning documents. Usable water zones would be isolated and protected under current regulations and Onshore Orders when permits are submitted and considered for approval.

**Invasive, Non-native Species:** Currently the Price Field office has agreements with Carbon and Emery county to treat noxious weeds on federal lands in which the county maintains roads. Furthermore, noxious weed introduction is limited by standard operating procedures and best management practices used as conditions of approval for surface use authorizations. These practices include, equipment washing, inspections and treatments to limit the spread or introduction of invasive, not-native species. Lease notices are applied to parcels that are in areas where invasive, non-native species already occur. The parcels offered in this lease sale are not within an area known to contain invasive, non-native species.

**Native American Religious Concerns:** On September 29, 2008 certified consultation letters (attached to the cultural staff report in Attachment 4) were sent to the following Tribes: Pueblo of Laguna, Pueblo of Nambe, Pueblo of Santa Clara, Pueblo of Zia, Pueblo of Zuni, Navajo, Hopi, Uintah and Ouray Ute, Ute Mountain Ute, and Paiute. The letters requested comments to be provided to the PFO within 30 days upon receipt of the letter. As of October 29, 2008, no responses have been received.

**Cultural Resources:** The area of potential effect as defined for the December 2008 Oil and Gas Lease Sale is identified by the legal descriptions provided in Attachment 2 for each lease parcel. The parcels within this lease sale were reviewed for the presence of cultural resources.

The information on previous archaeological inventories and recorded sites comes from the archaeological site files located at the BLM Field Office in Price, Utah. Additional sites are expected to exist that have not been recorded. The existing inventories and others surrounding these parcels are sufficient to determine that historic properties are likely to be present on each proposed lease parcel.

This evaluation is based on the assumption, supported by topography, perceived site density, existing access possibilities and previous inventories in the areas of the parcel, that there should be a place on each lease parcel that one five acre well pad could be developed without directly affecting a significant cultural resource. Also it is the policy of this office that with the addition of the stipulation required by WO IM 2005-003, the BLM can avoid all impacts to cultural resources. Potential impacts to cultural resources in Nine Mile Canyon due to dust are being addressed by the use of an intense dust suppression program by the companies. Any additional concerns would be addressed in site specific NEPA documentation.

It is submitted that this oil and gas lease undertaking falls under the purview of the Protocol negotiated between BLM and the Utah State Historic Preservation Office, a document designed to assist BLM in meeting its responsibilities under the National Historic Preservation Act, various implementing regulations, and the National Cultural Programmatic Agreement. Further, the view taken here is that the undertaking does not exceed any of the review thresholds listed in Part VII (A) of the Protocol, and that it may be viewed as a No Historic Properties Affected; eligible sites present, but not affected as defined by 36CFR800.4 [VII (A) C (4)]. This undertaking will be documented in the Protocol log and sent to the SHPO in December 2008.

To assure appropriate consideration of future effects from the December 2008 lease sale, the BLM will add the following "lease stipulation" (WO-IM-2005-003), to all parcels offered for lease.

*“This lease may be found to contain historic properties and/or resources protected under the National Historic Preservation Act (NHPA), American Indian Religious Freedom Act, Native American Graves Protection and Repatriation Act, E.O. 13007, or other statutes and executive orders. The BLM will not approve any ground disturbing activities that may affect any such properties or resources until it completes its obligations under applicable requirements of the NHPA and other authorities. The BLM may require modification to exploration, or development proposals to protect such properties, or disapprove any activity that is likely to result in adverse effects that cannot be successfully avoided, minimized or mitigated.”(WO-IM 2005-03).*

**Special Status Species:** Habitat evaluations were conducted for special status plant and wildlife species. Parcels containing potential habitat for threatened or endangered plant species have stipulation attached. Therefore there will likely be “no affect” on federally listed plant species within the Price Field Office.

The Price RMP has adequately addressed impacts which may result from oil and gas development regarding special status wildlife species. Therefore the current management guidance is sufficient to protect special status wildlife species.

**Wilderness Characteristics:** Several parcels are proximal to Wilderness Study Areas (WSAs); however, stipulations included for those parcels will mitigate any potential impacts for those adjacent to WSAs.

**ACECs:** Several parcels are in and associated with ACECs which require special efforts for protection. The stipulations assigned to these parcels would mitigate any potential impacts.

**Paleontological Resources:** The parcels recommended for lease are within areas where paleontological resources are known to occur in high concentrations. For those leases locating in the Green River Formation areas, pre-work surveys are not recommended; however, a qualified paleontologist is required to be on site during earth-disturbing activities. For parcels in the Morrison and Cedar Mountain Formation areas, a pre-work survey is required in addition to having a qualified paleontologist present during surface disturbing activities. These stipulations would mitigate possible impacts to paleontological resources.

**Wild Horse and Burro Resources:** The parcels recommended for lease are not within a Wild Horse and burro Management Area.

**Item 3: No for the following parcels:**

None

**4. Do the methodology and analytical approach used in the existing NEPA document(s) continue to be appropriate for the current proposed action?**

**Item 4: Yes for the following parcels:**

UT1108-058	UT1108-328	UT1108-338	UT1108-349
UT1108-319	UT1108-329	UT1108-339	UT1108-350

UT1108-362	UT1108-365	UT1108-368	UT1108-371
UT1108-363	UT1108-366	UT1108-369	

**Item 4: Rationale for “Yes”:** The methodology and approach used in the Price RMP is adequate.

**Item 4: No for the following parcel:**

None

5. Are the direct and indirect impacts of the current proposed action substantially unchanged from those identified in the existing NEPA document(s)? Do the existing NEPA documents analyze impacts related to the current proposed action at a level of specificity appropriate to the proposal (plan level, programmatic level, project level)?

**Item 5: Yes for the following parcels:**

UT1108-058	UT1108-331	UT1108-343	UT1108-359
UT1108-319	UT1108-332	UT1108-344	UT1108-360
UT1108-320	UT1108-333	UT1108-345	UT1108-361
UT1108-321	UT1108-334	UT1108-346	UT1108-362
UT1108-322	UT1108-335	UT1108-348	UT1108-363
UT1108-323	UT1108-336	UT1108-349	UT1108-364
UT1108-324	UT1108-337	UT1108-350	UT1108-365
UT1108-325	UT1108-338	UT1108-351	UT1108-366
UT1108-326	UT1108-339	UT1108-352	UT1108-367
UT1108-327	UT1108-340	UT1108-355	UT1108-368
UT1108-328	UT1108-341	UT1108-356	UT1108-369
UT1108-329	UT1108-342	UT1108-357	UT1108-370
UT1108-330		UT1108-358	UT1108-371

**Item 5: Rationale for “Yes”:** The RMP evaluated the direct and indirect impacts of oil and gas leasing. No significant new information or circumstances have been identified which would render the existing analyses inadequate for leasing the above parcels.

**Item 5: No for the following parcels:**

None

6. Can you conclude without additional analysis or information that the cumulative impacts that would result from implementation of the current proposed action are substantially unchanged from those analyzed in the existing NEPA document(s)?

**Item 6: Yes for the following parcels:**

UT1108-058	UT1108-322	UT1108-326	UT1108-330
UT1108-319	UT1108-323	UT1108-327	UT1108-331
UT1108-320	UT1108-324	UT1108-328	UT1108-332
UT1108-321	UT1108-325	UT1108-329	UT1108-333

UT1108-334	UT1108-343	UT1108-355	UT1108-364
UT1108-335	UT1108-344	UT1108-356	UT1108-365
UT1108-336	UT1108-345	UT1108-357	UT1108-366
UT1108-337	UT1108-346	UT1108-358	UT1108-367
UT1108-338	UT1108-348	UT1108-359	UT1108-368
UT1108-339	UT1108-349	UT1108-360	UT1108-369
UT1108-340	UT1108-350	UT1108-361	UT1108-370
UT1108-341	UT1108-351	UT1108-362	UT1108-371
UT1108-342	UT1108-352	UT1108-363	

**Item 6: Rationale for "Yes":** The cumulative impacts of oil and gas including coal-bed methane development have been analyzed in the Price RMP, 2008.

The Price RMP analyzed 1900 well location, 600 of which are located on the West Tavaputs plateau. Because the reasonably foreseeable level of oil and gas activity analyzed is still appropriate and additional connected, cumulative, or similar actions are not anticipated; potential cumulative impacts are substantially unchanged from those analyzed in the Price RMP.

**Item 6: No for the following parcels:**

None

7. Are the public involvement and interagency review associated with existing NEPA document(s) adequate for the current proposed action?

**Item 7: Yes for the following parcels:**

UT1108-058	UT1108-331	UT1108-343	UT1108-359
UT1108-319	UT1108-332	UT1108-344	UT1108-360
UT1108-320	UT1108-333	UT1108-345	UT1108-361
UT1108-321	UT1108-334	UT1108-346	UT1108-362
UT1108-322	UT1108-335	UT1108-348	UT1108-363
UT1108-323	UT1108-336	UT1108-349	UT1108-364
UT1108-324	UT1108-337	UT1108-350	UT1108-365
UT1108-325	UT1108-338	UT1108-351	UT1108-366
UT1108-326	UT1108-339	UT1108-352	UT1108-367
UT1108-327	UT1108-340	UT1108-355	UT1108-368
UT1108-328	UT1108-341	UT1108-356	UT1108-369
UT1108-329	UT1108-342	UT1108-357	UT1108-370
UT1108-330		UT1108-358	UT1108-371

**Item 7: Rational for "Yes":** The public involvement and interagency review procedures and findings provided extensive public and other agency involvement opportunities during the scoping process in early 2002. Scoping meetings were held in Salt Lake, Green River, Price, Castle Dale, and Moab, Utah, and in Grand Junction, Colorado. The scoping period, its results, and additional agency and public participation are described in Chapter 5 of the RMP, Consultation and Coordination. The *Draft RMP/EIS* and *Notice of Availability (NOA)* was published July 2004. The *Draft EIS* considered public and agency comments received during the scoping process, described the alternatives, described the environment that would be affected, and assessed the potential impacts. The public and agencies reviewed and commented on the *Draft EIS* during a comment period that ended November 29, 2004. The BLM held public open houses for informational purposes and received comments from the public.

Analysis and response to public comments are described and contained in Chapter 5 of the RMP under the heading "Comment Analysis." Additional public comment periods were held for the Draft RMP/EIS ACEC information (December 13, 2005 through February 12, 2006), the *Supplemental Information and Analysis to the Price Field Office Draft RMP/EIS for ACECs* (June 9, 2006 through September 7, 2006), and the *Supplement to the Price Field Office Draft RMP/EIS for Non-WSA Lands with Wilderness Characteristics* (September 14, 2007 through December 13, 2007). The purpose of the Proposed RMP/Final EIS was for the BLM to assess, consider, and respond to comments received on the Draft RMP/EIS and to lay out the Proposed RMP for management of public lands using the draft alternatives as a base line. A 30-day protest period followed the release of the Proposed RMP/Final EIS, along with a 60-day governor's consistency review.

**Item 7: No for the following parcels:**

**None**

**E. Interdisciplinary Analysis:** Identify those team members conducting or participating in the preparation of this worksheet. An Interdisciplinary checklist is attached to this DNA.

<b>Name</b>	<b>Title</b>	<b>Resource Represented</b>
Blaine Miller	Natural Resource Specialist	Native American Consultation
Tom Gnojek	Outdoor Recreation Planner	Wilderness, Recreation
Floyd Johnson	Environmental Coordinator	NEPA
Karl Ivory	Range Management Specialist	T&E Plants/Weeds
Mike Leschin	Geologist/Paleontology	Paleontology
Blaine Miller	Archaeologist	Cultural Resource
Mike Tweddell	Range Management Specialist	Wild Horses & Burros
David Waller	Wildlife Biologist	T&E Wildlife
Don Stephens	Natural Resource Specialist	Geology
Dana Truman	Natural Resource Specialist	Soil, Vegetation
Jeff Brower	Hydrologist	Farmlands, Floodplains, Water Quality

F. **Mitigation Measures:** The following Lease Notices and/or Lease Stipulations should be applied to the identified, subsequent parcels (these are in addition to those applied by the Utah State Office).

**In addition to the Stipulations below, the Washington Office (WO-IM-2005-003), (WO-IM-2002-174) and Stipulation S-25: Air Quality should be applied to all parcels:**

**CONCLUSIONS**

**Plan Conformance and Determination of NEPA Adequacy**

Based on the review documented above, I conclude that the following parcels conform with the existing land use plans and have adequate NEPA:

UT1108-058	UT1108-331	UT1108-343	UT1108-359
UT1108-319	UT1108-332	UT1108-344	UT1108-360
UT1108-320	UT1108-333	UT1108-345	UT1108-361
UT1108-321	UT1108-334	UT1108-346	UT1108-362
UT1108-322	UT1108-335	UT1108-348	UT1108-363
UT1108-323	UT1108-336	UT1108-349	UT1108-364
UT1108-324	UT1108-337	UT1108-350	UT1108-365
UT1108-325	UT1108-338	UT1108-351	UT1108-366
UT1108-326	UT1108-339	UT1108-352	UT1108-367
UT1108-327	UT1108-340	UT1108-355	UT1108-368
UT1108-328	UT1108-341	UT1108-356	UT1108-369
UT1108-329	UT1108-342	UT1108-357	UT1108-370
UT1108-330		UT1108-358	UT1108-371

Based on information identified in the 2008 Price RMP EIS, the current land management prescriptions no longer provide adequate protection of specific resource values located within the parcels listed below (refer to Attachment 3 deferred parcel table rationale).

# INTERDISCIPLINARY TEAM ANALYSIS RECORD CHECKLIST

**Project Title:** December 2008 Competitive Oil and Gas Lease Sale

**NEPA Log Number:**

**File/Serial Number:** 1310

**Project Leader:** Chris Conrad

**DETERMINATION OF STAFF: (Choose one of the following abbreviated options for the left column)**

NP = not present in the area impacted by the proposed or alternative actions

NI = present, but not affected to a degree that detailed analysis is required

PI = present with potential for significant impact analyzed in detail in the EA; or identified in a DNA as requiring further analysis

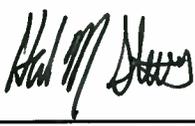

NC = (DNAs only) actions and impacts not changed from those disclosed in the existing NEPA documents cited in Section C of the DNA form.

Determi- nation	Resource	Rationale for Determination*	Signature	Date
<b>CRITICAL ELEMENTS</b>				
NI	Air Quality	The proposed action would not exceed the level of activity projected in the RMP. Given the low level of drilling and related activity, only minimal emissions are anticipated. There would be no significant changes in circumstances or conditions that warrant further analysis relative to leasing.		11/03/08
NI	Areas of Critical Environmental Concern	Given the degree of anticipated exploration and development and application of standard operating procedures, best management practices and site specific mitigation applied at the APD stage as conditions of approval, it is concluded that Areas of Critical Environmental Concern would not be affected in a way not already analyzed in the Price RMP		11/07/08
NI	Cultural Resources	A cultural resource records search was completed for lands involved with the subject lease sale parcels. Cultural resources are or could be present in all lease areas; but, there is room on each lease parcel to locate at least one well pad, ancillary facilities and afford reasonable access and still avoid any cultural resources that may be present. The Utah Protocol Part VII.A.C. was applied to this cultural resource review for the August 2008 lease sale and the PFO determination under the Protocol review threshold (Part VII.A.C(4)) is: "No Historic Properties Affected; Eligible Sites Present But Not Affected As Defined By 36 CFR 800.4."  A cultural inventory is done prior to all surface disturbing activities and a Section 106 consultation will be done to ensure that cultural and historic properties are avoided or are not adversely affected. See attached Cultural Resources Specialist report.		
NI	Environmental Justice	The ethnic composition and economic situation of residents of Carbon and Emery Counties indicate that no minority or low-income populations are experiencing disproportionately high or adverse effects from current management actions (RMP EIS, pg 3-62). Leasing would not adversely or disproportionately affect		11/4/08

Determination	Resource	Rationale for Determination*	Signature	Date
		minority, low income or disadvantaged groups.		
NP	Farmlands (Prime or Unique)	The parcels do not contain lands that meet the criteria for prime, state important, or unique farmlands.		11/03/08
NP	Floodplains	The parcel does not contain lands that meet the criteria for floodplain or riparian/aquatic habitat.		11/03/08
NI	Invasive, Non-native Species	Given the degree of anticipated exploration and development and application of standard operating procedures, best management practices and site specific mitigation applied at the APD stage as conditions of approval, it is concluded that Invasive species resources would not be affected in a way not already analyzed in the Price RMP.		10/30/08
NI	Native American Religious Concerns	Letters containing notification of this lease sale and the results of a cultural resources records search were sent to the Tribes on September 29, 2008 to the tribes listed in an attachment. The letters detailed the leasing proposal and requested comments and concerns. All responses are disclosed in the DNA; however, no concerns were raised by the tribes to date. Consultation will be considered complete if tribal response presents no objections or if response is not received prior to the date of the proposed sale. Additional consultation will be conducted should site-specific use authorization requests be received. As the proposal becomes more site-specific, tribes will again be notified and given further opportunity for comment.		11/4/08
NI	Threatened, Endangered or Candidate Plant Species	Given the degree of anticipated exploration and development and application of standard operating procedures, best management practices and site specific mitigation applied at the APD stage as conditions of approval, it is concluded that Threatened, Endangered or Candidate Species resources would not be affected in a way not already analyzed in the Price RMP.		10/30/08
NI	Threatened, Endangered or Candidate Animal Species	Lease Notices and stipulations have been attached to parcels that are known to contain threatened, endangered or candidate animal species or their habitat and site-specific surveys will determine whether T&E animal species are present. Should T&E animal species be found, the surface use plan of operations may be amended to protect or avoid these species. As such there will likely be no adverse impacts to T&E animal species		2008- Oct-31
NI	Wastes (hazardous or solid)	Drilling fluids, produced waters, and other wastes associated with the exploration, development or production of crude or natural gas are excluded as a hazardous waste under 40 CFR 261.4(b)(4). Application of standard operating procedures, best management practices and conditions of approval (COA) at the APD stage would be sufficient to ensure proper containment, transport and disposal of solid or toxic waste if any are required or generated. Additionally, all hazardous materials used or produced must be reported to the PFO. They must be removed and disposed in an appropriately permitted disposal facility. Solid waste must be removed and properly disposed		11/03/08
NI	Water Quality (drinking/ground)	Standard operating procedures (including the requirements for disposal of produced water contained in Onshore Oil and Gas Order (OOGO) #7 and the requirements for drilling operations contained in OOGO #2) and site specific drilling requirements applied as conditions of approval at the APD stage would be sufficient to isolate and protect all usable water zones.		11/03/08

Determination	Resource	Rationale for Determination*	Signature	Date
NI	Wetlands/Riparian Zones	Wetlands/riparian zones are indirectly but adequately addressed in discussions of drainages, streams, rivers, lakes, ponds, waterholes, seeps, marshes, and wildlife habitat in the Price River MFP. In conformance with the MFP, parcels or portions of parcels having wetlands and riparian/aquatic areas would be leased with NSO and/or CSU stipulations to protect those areas. Additionally, application of standard lease terms and the "200 meter" rule of 43 CFR 3101.1-2 prior to any surface disturbing activities would afford additional protection.	Karl Wang	10/30/08
NI	Wild and Scenic Rivers	There are no parcels recommended for lease that contain river segments which have been designated, or found to be suitable for possible designation, as a Wild and Scenic Rivers		11/03
NP	Wilderness	There are no lands designated as Wilderness present.		11/03/08
NI	Rangeland Health Standards and Guidelines	Water quality, vegetation, Threatened & Endangered Species habitat and other components of ecological conditions that are considered in Rangeland Health Standards and Guides have been analyzed in the Price RMP. Given the degree of anticipated exploration and development and application of standard operating procedures, best management practices and mitigation applied at the APD stage as conditions of approval it is concluded that Rangeland Health Standards would be met.	Ray Jensen	10/30/08
NI	Livestock Grazing	Given the degree of anticipated exploration and development and application of standard operating procedures, best management practices and site specific mitigation applied at the APD stage as conditions of approval, it is concluded that existing analysis is adequate and that livestock grazing operation would not be affected.	Ray Jensen	10/30/08
NI	Woodland / Forestry	Given the degree of anticipated exploration and development and application of standard operating procedures, best management practices and site specific mitigation applied at the APD stage as conditions of approval, it is concluded that woodland or forest resources would not be affected in a way not already analyzed in existing NEPA documents.	Karl Wang	10/30/08
NP	Vegetation including Special Status Plant Species other than FWS candidate or listed species	Given the degree of anticipated exploration and development and application of standard operating procedures, best management practices and site specific mitigation applied at the APD stage as conditions of approval, it is concluded that Vegetation and Special Status Species resources would not be affected in a way not already analyzed in the Price RMP.	Karl Wang	10/30/08
NI	Fish and Wildlife Including Special Status Species other than FWS candidate or listed species e.g. Migratory birds.	This parcel contains crucial wildlife habitat. (See attached specialist report). In conformance with the Price RMP, parcels or portions of parcels within crucial wildlife habitat would be leased with a special stipulation that prevents drilling operations during the crucial period. Therefore, no impacts to Special Status Species are expected from the proposed action.	David L. Walker	2008-04-21
NI	Soils	Given the low degree of anticipated exploration and application of standard operating procedures, best management practices and site specific mitigation applied at the APD stage including reclamation, as conditions of approval it is concluded that existing analysis is adequate and potential impacts on soils have been adequately addressed.		11/03/08

Determination	Resource	Rationale for Determination*	Signature	Date
NI	Recreation	In addition to minor amounts of dispersed recreation, there are existing recreation resources (e.g., Price Canyon Recreation Site, the access road leading to that facility, Indian Canyon Utah State Scenic Byway / Dinosaur Diamond Prehistoric Highway National Scenic Byway, Nine Mile Canyon Scenic Backway and the view shed surrounding these facilities). Given the degree of anticipated exploration and development identified in the land use plans cited in the DNA, application of standard operating procedures, best management practices and the provisions of 43CFR 3101.1-2 would mitigate, impacts to recreation. Additionally, site specific mitigation applied at the APD stage as conditions of approval, including reclamation, would mitigate impacts to recreation opportunities.		11/07/08
NI	Visual Resources	Given the degree of anticipated exploration and development identified in the land use plans cited in the DNA, application of standard operating procedures, best management practices and the provisions of 43CFR 3101.1-2 would mitigate, impacts to recreation. Additionally, site specific mitigation applied at the APD stage as conditions of approval, including reclamation, would mitigate impacts to recreation opportunities.		11/07/08
NI	Geology / Mineral Resources/Energy Production	<p>The existing NEPA documents cited in the DNA adequately address the impacts of oil and gas leasing.</p> <p>Oil and gas exploration could lead to an increased understanding of the geologic setting, as subsurface data obtained through lease operations may become public record. This information promotes an understanding of mineral resources as well as geologic interpretation.</p> <p>Conflicts could arise between oil and gas operations and other mineral operations. These could generally be mitigated under the regulations 3101.1-2, where proposed oil and gas operations may be moved up to 200 meters or delayed by 60 days and also under the standard lease terms (Sec. 6) where siting and design of facilities may be modified to protect other resources.</p>		11/14/08
NI	Paleontology	Paleontological resources are known to exist within the parcels recommended for leasing. The stipulations attached to the leases will mitigate the potential losses.		11/30/08
NI	Lands / Access	As described, the proposed action would not affect access to public land. No roads providing access to public land would be closed on a long term basis. Any proposed project would be subject to valid prior existing rights and any operations would be coordinated with right-of-way (ROW) Holders and adjacent non-federal landowners (See attached MTP pages). Off-lease ancillary facilities that cross public land, if any, may require a separate authorization. Existing ROW in proposed operation areas would not be affected because site specific mitigation applied at the APD stage, including the ability to move operations up to 200 meters, would ensure that communication sites, water projects, power lines, etc. would be avoided, restored or replaced. The described parcels are not located within an identified ROW corridor. Potential issues include but are not limited to surface disturbance within and outside described project areas and generated trash/debris should be removed from public land and discarded at an authorized facility.		11/31/08

Determination	Resource	Rationale for Determination*	Signature	Date
NI	Fuels / Fire Management	Impacts analyzed in the Price RMP are consistent with the proposed action. Application of standard operating procedures (SOPs), and site specific mitigation and safety measures applied at the APD stage would minimize the risk of inadvertent ignition. Impacts to fire or fuels management are not expected.		10/30/08
NI	Socio-economics	Socio-economic conditions are adequately addressed in the existing NEPA record. Given the level of development analyzed and documented in the NEPA documents referenced in this DNA, no further socio-economic analysis is required for the parcels recommended for leasing. No impacts to socio-economics are expected to occur as a result of the proposed action.		11/4/08
NP	Wild Horses and Burros	The parcel does not contain any lands managed for wild horses and burros.		10/30/08
NI	Wilderness characteristics	There are lands under study by Congress for possible designation as Wilderness (WSA status) adjacent to the parcels recommended for lease. (Desolation Canyon WSA and Jack Canyon WSA). Stipulations for locating WSA boundaries next to lease areas would mitigate any impacts.		11/03/08

Abbreviated Notices and Stipulations are listed below.

Stipulation Number	PRICE FIELD OFFICE STIPULATIONS
S-1	<p>NSO within 1/2 mile of greater sage-grouse leks.</p> <p><b>Exception:</b> The AO may grant an exception if an environmental analysis demonstrates that the action would not impair the function or utility of the site for current or subsequent reproductive display, including daytime loafing/staging activities, and/or would not result in development of a permanent aboveground structure within 1/2 mile of a lek.</p> <p><b>Modification:</b> The AO may modify the NSO area in extent if an environmental analysis finds that a portion of the NSO area is nonessential to site utility or function, or if further analysis shows that the size or location of the lek has changed, or that the proposed action could be conditioned to not impair the function or utility of the site for current or subsequent reproductive display including daytime loafing/staging activities.</p> <p><b>Waiver:</b> A waiver may be granted if there are no active lek sites and it is determined the sites have been completely abandoned or destroyed or occur outside the initial identified area, as determined by BLM.</p>

Stipulation Number	PRICE FIELD OFFICE STIPULATIONS
S-3	<p>NSO on slopes greater than 40 percent.</p> <p><b>Exception:</b> If after an environment analysis the AO determines that it would cause undue or unnecessary degradation to pursue other placement alternatives, surface occupancy in the area may be authorized. In addition, a plan from the operator and BLM's approval of the plan would be required before construction and maintenance could begin. The plan would have to include:</p> <ul style="list-style-type: none"> <li>• An erosion control strategy</li> <li>• GIS modeling</li> <li>• Proper survey and design by a certified engineer.</li> </ul> <p><b>Modification:</b> None <b>Waiver:</b> None</p>
S-4	<p>No surface disturbance or occupancy would be maintained around natural springs to protect the water quality of the spring. The distance would be based on geophysical, riparian, and other factors necessary to protect the water quality of the springs. If these factors cannot be determined, a 660-foot buffer zone would be maintained.</p> <p><b>Exception:</b> An exception could be authorized if (a) there are no practical alternatives, (b) impacts could be fully mitigated, or (c) the action is designed to enhance the riparian resources.</p> <p><b>Modification:</b> None <b>Waiver:</b> None</p>
S-5	<p>No new surface disturbance (excluding fence lines) would be required in areas equal to the 100-year floodplain or 100 meters (330 feet) on either side from the centerline, whichever is greater, along all perennial and intermittent streams, streams with perennial reaches, and riparian areas.</p> <p><b>Exception:</b> An exception could be authorized if (a) there are no practical alternatives, (b) impacts could be fully mitigated, or (c) the action is designed to enhance the riparian resources.</p> <p><b>Modification:</b> None <b>Waiver:</b> None</p>
S-6	<p>NSO for cultural values within areas of critical environmental concern (ACEC) to retain the cultural character and context of the area.</p> <p><b>Exception:</b> The AO may grant an oil and gas exception if it is determined that no other economical and technical feasible access is available to reach and drain the fluid mineral resources of the area. A block cultural survey must be completed and a treatment plan developed and submitted to BLM and the State Historic Preservation Office (SHPO) for their approval. The plan must contain measures to mitigate surface disturbance and reduce visual intrusion.</p> <p><b>Modification:</b> None <b>Waiver:</b> None</p>
S-7	<p>NSO within Trail Springs/Lost Springs Wash segment of the Old Spanish National Historic Trail to retain the historic character of the trail.</p> <p><b>Exception:</b> The AO may grant an exception if an environmental analysis demonstrates that the action would not impair the historic character of the trail.</p> <p><b>Modification:</b> None <b>Waiver:</b> None</p>

Stipulation Number	PRICE FIELD OFFICE STIPULATIONS
S-8	<p>NSO within developed recreation and administrative sites not consistent with the purpose of the site, including those authorized under a Recreation and Public Purpose Act.</p> <p><b>Exception:</b> An exception would be granted for surface disturbance that supports the recreation or administrative objectives of the site.</p> <p><b>Modification:</b> None</p> <p><b>Waiver:</b> None</p>
S-9	<p>Mule deer and elk winter range would be closed seasonally from December 1 to April 15.</p> <p><b>Exception:</b> Upon review and monitoring, the AO may grant exceptions because of climatic and/or range conditions if certain criteria are met and if activities would not cause undue stress to deer and elk populations or habitats.</p> <p><b>Modification:</b> Season may be adjusted depending on climatic and range conditions.</p> <p><b>Waiver:</b> A waiver may be granted if the winter range habitat is unsuitable for or unoccupied during winter months by deer/elk and there is no reasonable likelihood of future winter range use.</p>
S-10	<p>Mule deer fawning and elk calving areas would be closed seasonally from May 15 to July 5.</p> <p><b>Exception:</b> Upon review and monitoring, the AO may grant exceptions because of climatic and/or range conditions if certain criteria are met and if activities would not cause undue stress to deer and elk populations or habitats.</p> <p><b>Modification:</b> Season may be adjusted depending on climatic and range conditions.</p> <p><b>Waiver:</b> A waiver may be granted if the fawning and calving habitat is unsuitable or unoccupied by deer/elk and there is no reasonable likelihood of future use.</p>
S-11	<p>Desert bighorn sheep and Rocky Mountain bighorn sheep spring/lambing range would be closed seasonally from April 15 to June 15.</p> <p><b>Exception:</b> Upon review and monitoring, the AO may grant exceptions because of climatic and/or range conditions if certain criteria are met and if activities would not cause undue stress to Desert bighorn sheep and Rocky Mountain bighorn sheep populations or habitats.</p> <p><b>Modification:</b> Season may be adjusted depending on climatic and range conditions.</p> <p><b>Waiver:</b> A waiver may be granted if the habitat is determined to be unsuitable for lambing and there is no reasonable likelihood of future use as bighorn lambing grounds.</p>
S-12	<p>Moose winter range would be closed seasonally from December 1 to April 15.</p> <p><b>Exception:</b> Upon review and monitoring, the AO may grant exceptions because of climatic and/or range conditions if certain criteria are met and if activities would not cause undue stress to moose populations or habitats.</p> <p><b>Modification:</b> Season may be adjusted depending on climatic and range conditions.</p> <p><b>Waiver:</b> A waiver may be granted if the winter range habitat is unsuitable or unoccupied during winter months by moose and there is no reasonable likelihood of future winter range use.</p>
S-13	<p>Raptor nesting complexes and known raptor nest sites would be closed seasonally from February 1 to July 15.</p> <p><b>Exception:</b> The AO may grant an exception if the raptor nest in question is deemed to be inactive by May 31 and if the proposed activity would not result in a permanent structure or facility that would cause the subject nest to become unsuitable for nesting in future years.</p> <p><b>Modification:</b> Season may be adjusted depending on climatic and range conditions. Distance may be adjusted if natural features provide adequate visual screening.</p> <p><b>Waiver:</b> This stipulation may be waived if, in cooperation with the UDWR, it is determined that the site has been permanently abandoned or unoccupied for a minimum of 3 years.</p>

Stipulation Number	PRICE FIELD OFFICE STIPULATIONS
S-14	<p>Migratory bird nesting areas would be closed seasonally. Birds designated as BLM Special Status Species would have the highest priority from April 15 to August 1.</p> <p><b>Exception:</b> Upon review and monitoring, the AO may grant exceptions because of climatic and/or habitat conditions if activities would not cause undue stress to migratory bird populations.</p> <p><b>Modification:</b> Season may be adjusted depending on climatic and range conditions. Distance may be adjusted if natural features provide adequate visual screening.</p> <p><b>Waiver:</b> None</p>
S-15	<p>Allow no surface disturbing or otherwise disruptive activities within 2 miles of a known greater sage-grouse lek from March 15 to July 15.</p> <p><b>Exception:</b> The AO may grant an exception if an environmental analysis demonstrates that the action would not impair the function or utility of the habitat for nesting or early brood-rearing activities.</p> <p><b>Modification:</b> Season may be adjusted depending on climatic and habitat conditions. Disturbance could occur if the activity were proposed to occur within the buffer, but would occur in non-sagebrush habitat, i.e., the activity could be allowed if it was not in sage-grouse habitat and did not in some other way disturb nesting or brood-rearing activity.</p> <p><b>Waiver:</b> This stipulation may be waived if, in cooperation with UDWR, it is determined that the site has been permanently abandoned or unoccupied for a minimum of 5 years.</p>
S-16	<p>Sage-grouse wintering areas would be closed seasonally from December 1 to March 14.</p> <p><b>Exception:</b> Upon review and monitoring, the AO may grant exceptions because of climatic and/or habitat conditions if certain criteria are met and if activities would not cause undue stress to wintering greater sage-grouse</p> <p><b>Modification:</b> Season may be adjusted depending on climatic and habitat conditions.</p> <p><b>Waiver:</b> This stipulation may be waived if, in cooperation with the State wildlife agency, it is determined that the site has been permanently abandoned or unoccupied for a minimum of 5 years.</p>
S-17	<p>High-country watershed areas would be closed seasonally from December 1 to April 15.</p> <p><b>Exception:</b> Upon review and monitoring, the AO may grant exceptions because of climatic conditions if activities would not cause undue damage to soils or roads.</p> <p><b>Modification:</b> Season may be adjusted depending on climatic and vegetation conditions.</p> <p><b>Waiver:</b> Activities may be allowed as long as all surface disturbing activities are conducted before seasonal closure.</p>
S-18	<p>In surface disturbing proposals regarding construction on slopes of 20 percent to 40 percent, include an approved erosion control strategy and topsoil segregation/restoration plan. Such construction must be properly surveyed and designed by a certified engineer and approved by the BLM prior to project implementation, construction, or maintenance.</p> <p><b>Exception:</b> If after an environment analysis the AO determines that it would cause undue or unnecessary degradation to pursue other placement alternatives, surface occupancy in the area may be authorized. In addition, a plan from the operator and BLM's approval of the plan would be required before construction and maintenance could begin. The plan must include:</p> <ul style="list-style-type: none"> <li>• An erosion control strategy</li> <li>• GIS modeling</li> <li>• Proper survey and design by a certified engineer.</li> </ul> <p><b>Modification:</b> Modifications also may be granted if a more detailed analysis, e.g., Order I soil survey conducted by a qualified soil scientist, finds that surface disturbance activities could occur on slopes between 20 and 40 percent while adequately protecting areas from accelerated erosion.</p> <p><b>Waiver:</b> None</p>

Stipulation Number	PRICE FIELD OFFICE STIPULATIONS
S-19	<p>Within VRM II areas, surface disturbing activities would comply with BLM Manual Handbook 8431-1 to retain the existing character of the landscape.</p> <p><b>Exception:</b> Recognized utility corridors are exempt. Temporary exceedance may be allowed during initial development phases.</p> <p><b>Modification:</b> None</p> <p><b>Waiver:</b> None</p>
S-20	<p>Cultural resources inventories (including point, area, and linear features) would be required for all federal undertakings that could affect cultural resources or historic properties in areas of both direct and indirect impacts.</p> <p><b>Waiver of Inventory</b></p> <p>Although complete Class III inventories would be performed for most land use actions, a field manager could waive inventory for any part of an Area of Potential Effect when one or more of the following conditions exist:</p> <ul style="list-style-type: none"> <li>• Previous natural ground disturbance has modified the surface so extensively that the likelihood of finding cultural properties is negligible. (Note: This is not the same as being able to document that any existing sites may have been affected by surface disturbance; ground disturbance must have been so extensive as to reasonably preclude the location of any such sites.)</li> <li>• Human activity within the last 50 years has created a new land surface to such an extent as to eradicate locatable traces of cultural properties.</li> <li>• Existing Class II or equivalent inventory data are sufficient to indicate that the specific environmental situation did not support human occupation or use to a degree that would make further inventory information useful or meaningful.</li> <li>• Previous inventories must have been conducted according to current professionally acceptable standards.</li> <li>• Records are available and accurate and document the location, methods, and results of the inventory.</li> <li>• Class II “equivalent inventory data” includes an adequate amount of acreage distributed across the same specific environmental situation that is located within the study area.</li> <li>• Inventory at the Class III level has previously been performed, and records documenting the location, methods, and results of the inventory are available. Such inventories must have been conducted according to current professionally acceptable standards.</li> <li>• Natural environmental characteristics (such as recent landslides or rock falls) are unfavorable to the presence of cultural properties.</li> <li>• The nature of the proposed action is such that no impact can be expected on significant cultural resources.</li> <li>• Conditions exist that could endanger the health or safety of personnel, such as the presence of hazardous materials, explosive ordnance, or unstable structures.</li> </ul>
S-21a	<p>An assessment of fossil resources would be required on a case-by-case basis, mitigating as necessary before and during surface disturbance.</p> <p><b>Exception:</b> The AO may grant an exception if the area has previously been inventoried and an assessment completed.</p> <p><b>Modification:</b> None</p> <p><b>Waiver:</b> None</p>

Stipulation Number	PRICE FIELD OFFICE STIPULATIONS
S-21b	<p>An assessment of fossil resources would be required on a case-by-case basis, mitigating as necessary during surface disturbance.</p> <p><b>Exception:</b> The AO may grant an exception if the area has previously been inventoried and an assessment completed.</p> <p><b>Modification:</b> None</p> <p><b>Waiver:</b> None</p>
S-22	<p>Any surface use or occupancy within designated critical habitat would be strictly controlled through close scrutiny of any surface use plan filed to protect habitat values and the use of the area by Mexican spotted owls. Modifications to the Surface Use Plan of Operations may be required for the protection of these resources. This limitation may apply to operation and maintenance of producing wells.</p> <p><b>Exception:</b> The AO may grant an exception if an environmental analysis demonstrates that the action would not impair the function or utility of the site for nesting or other owl-sustaining activities.</p> <p><b>Modification:</b> The AO may modify the CSU area in extent if an environmental analysis finds that a portion of the area is nonessential to site utility or function or if natural features provide adequate visual or auditory screening.</p> <p><b>Waiver:</b> A waiver may be granted if the species is de-listed and the critical habitat is determined as not necessary for the survival and recovery of the species.</p>
S-23	<p>Follow guidelines and implement management recommendations presented in species recovery or conservation plans or alternative management strategies developed in consultation with USFWS. Use emergency actions where use threatens known communities of special status plant or animal species.</p> <p>Prohibit surface disturbances that may affect listed species or critical habitat of listed or candidate plants or animals without consultation or conference (ESA, Section 7) between the BLM and USFWS.</p>
S-24	<p>Continue implementation of noxious weed and invasive species control actions in accordance with national guidance and local weed management plans, in cooperation with State, federal, affected counties, adjoining private land owners, and other partners or interests directly affected. Implement Standard Operating Procedures and Mitigation Measures for herbicide use as well as prevention measures for noxious and invasive plants identified in the Record of Decision Vegetation Treatments Using Herbicides on Bureau of Land Management Lands in 17 Western States PEIS and associated documents.</p>
S-25	<p><b>Air Quality:</b> All new and replacement internal combustion gas field engines of less than or equal to 300 design-rated horsepower must not emit more than 2 gms of NO<sub>x</sub> per horsepower-hour.</p> <p><b>Exception:</b> This requirement does not apply to gas field engines of less than or equal to 40 design-rated horsepower.</p> <p><b>Modification:</b> None</p> <p><b>Waiver:</b> None</p> <p><b>Air Quality:</b> All and replacement internal combustion gas field engines of greater than 300 design rated horsepower must not emit more than 1.0 gms of NO<sub>x</sub> per horsepower-hour.</p> <p><b>Exception:</b> None.</p> <p><b>Modification:</b> None</p>

Additional Notes:

UT1108-346 and 351 are in the Gordon Creek WMA, overlay by state lands in some cases.

**Need to consult with FWS before leasing.**

## *Vegetation, Threatened and Endangered Species*

### **Riparian/wetland areas, springs, noxious weeds and special status plant species.**

Stipulations for springs and riparian/wetlands are found in Appendix G of the RMP and are referred to as S-04 and S-05.

- S-04 No surface disturbance or occupancy would be maintained around natural springs to protect the water quality of the spring. The distance would be based on geophysical, riparian, and other factors necessary to protect the water quality of the springs. If these factors cannot be determined, a 660-foot buffer zone would be maintained.
- S-05 No new surface disturbance (excluding fence lines) would be required in areas equal to the 100-year floodplain or 100 meters (330 feet) on either side from the centerline, whichever is greater, along all perennial and intermittent streams, streams with perennial reaches, and riparian areas.

Stipulations for special status species are found on pages 2-29 and 2-30 in the RMP and are referred to as S-23.

- S-23 Follow guidelines and implement management recommendations presented in species recovery or conservation plans or alternative management strategies developed in consultation with USFWS.  
  
Use emergency actions where use threatens known communities of special status plant or animal species.  
  
Prohibit surface disturbances that may affect listed species or critical habitat of listed or candidate plants or animals without consultation or conference (ESA, Section 7) between the BLM and USFWS.

Stipulations for noxious/invasive weed management are found on pages 2-21 in the RMP and are referred to as S-24.

- S-24 Continue implementation of noxious weed and invasive species control actions in accordance with national guidance and local weed management plans, in cooperation with State, federal, affected counties, adjoining private land owners, and other partners or interests directly affected.  
  
Implement Standard Operating Procedures and Mitigation Measures for herbicide use as well as prevention measures for noxious and invasive plants identified in the Record of Decision Vegetation Treatments Using Herbicides on Bureau of Land Management Lands in 17 Western States PEIS and associated documents.

*Cultural Resources*

**Cultural Resource Assessment of December 2008 Oil & Gas Lease Sale**

Public land parcels identified by the BLM for its scheduled December 2008 O&G lease sale have been assessed relative to potential impacts to cultural resources. Fifty three parcels were reviewed.

**UT1108-319** This parcel is located on the Price River. There has been no previous archaeological inventories in this parcel. Inventories nearby have been limited. This parcel is mainly steep slopes along the Price River. Only a few sites would be expected in this parcel because of the topography. There is likely an area on this parcel for a well pad to be located without affecting a historic property.

**UT1108-320** This parcel is at the head of Price Canyon, The parcel has only one archaeological site previous recorded. There are sites known to present, including those associated with a historic railroads, a historic highway and historic water systems for Price and Helper cities. There is likely an area on this parcel for a well pad to be located without affecting a historic property.

**UT1108-321 to 324** These parcels are located in the area of former coal leases of the Willow Creek Mine. Fourteen archaeological inventories, covering about 1592 acres, have previously been made within

these parcels. Four archaeological sites have been recorded. It is likely there are areas for development of a well pad without affecting a historic property.

**U1108-325-345, 347-350, 354, 355** These parcels are within the area effected by the west Tavaputs Gas Development. Development of these parcels could increase the cumulative adverse impact to cultural resources.

**U1108-346 and 351** These parcel are in the area of the north and south forks of Gordon Creek. . Five archaeological inventories, covering about 60 acres, have previously been made within these parcels. Seven archaeological sites have been recorded. The site density is very high within the canyons of Gordon Creek and developing well pad there would likely effect cultural resources. Elsewhere it is likely there are areas for development of a well pad without affecting a historic property.

**U1108-352 to 353** These parcels are located north of East Carbon. Five archaeological inventories, covering about 65 acres, have previously been made within these parcels. No archaeological sites have been recorded. It is likely there are areas for development of a well pad without affecting a historic property.

**U1108-356 TO 370** These parcels are located west and south of Green River. Twenty nine archaeological inventories, covering about 1313 acres, have previously been made within these parcels. Twelve archaeological sites have been recorded. It is likely there are areas for development of a well pad without affecting a historic property. Parcels 356,357 and 358 have the Old Spanish Trail running through them and should have an Old Spanish Trail NTL attached to them.

**U1108-371** This parcel is within the Dry Lake Archaeological ACEC. It should have NSO stipulation S-06 attached

As per WO IM 2005-003 the following stipulation should be applied to each parcel:“This lease may be found to contain historic properties and/or resources protected under the National Historic Preservation Act (NHPA), American Indian Religious Freedom Act, Native American Graves Protection and Repatriation Act, E.O. 13007, or other statutes and executive orders. The BLM will not approve any ground disturbing activities that may affect any such properties or resources until it completes its obligations under applicable requirements of the NHPA and other authorities. The BLM may require modification to exploration or development proposals to protect such properties, or disapprove any activity that is likely to result in adverse effects that cannot be successfully avoided, minimized or mitigated.”

The area of potential effect for this undertaking is generally the entire lease parcel as defined in Appendix 1.

The information on previous archaeological inventories and recorded sites comes from the archaeological site files located at the BLM Field Office in Price, Utah. Many of the previous inventories are over twenty years old and were made at a different standard than today. Sites are expected to exist that have not been recorded. The inventories surrounding these parcels are sufficient to determine that historic properties are likely to be present on the proposed lease parcel.

This evaluation is based on the assumption, supported by topography, perceived site density, existing access possibilities and previous inventories in the areas of the parcels, there should be a place on each

lease parcel that one five acre well pad could be developed without directly affecting a significant cultural resource.

It is submitted that this oil and gas lease undertaking falls under the purview of the Protocol negotiated between BLM and the Utah State Historic Preservation Office, a document designed to assist BLM in meeting its responsibilities under the National Historic Preservation Act, various implementing regulations, and the National Cultural Programmatic Agreement. Further, the view taken here is that the undertaking does not exceed any of the review thresholds listed in Part VII (A) of the Protocol, and that it may be viewed as a No Historic Properties Affected; eligible sites present, but not affected as defined by 36CFR800.4 [VII (A) C (4)].

### *Paleontological Resources*

Parcels in this lease sale very much have the likelihood of impacting paleontological resources. Our response is not identical throughout however. Some of the parcels are located in areas of Green River Formation outcrops and some are located in areas where Morrison Formation and Cedar Mtn Formation are cropping out. For those in the Green River Formation areas, pre-work surveys are pretty much useless and I do not recommend them. I do however, strongly recommend a qualified paleontologist on site during earth-disturbing activities. For parcels in the Morrison and Cedar Mtn areas, a pre-work survey AND a qualified paleontologist present during surface disturbing activities are highly recommended.

Green River Formation on surface:

## VEGETATION

### Threatened and Endangered Species Riparian Corridors (Rivers and Springs)

1. November 2008 Staff Report

## CULTURAL RESOURCES

1. November 2008 Cultural Staff Report

### Cultural Resource Assessment of <sup>November</sup>~~August~~ 2008 Oil & Gas Lease Sale

Public land parcels identified by the BLM for its scheduled November 2008 O&G lease sale have been assessed relative to potential impacts to cultural resources. One parcel was reviewed.

#### **UT1108-058**

The parcel is located on a northward facing slope between Pole Canyon and Cow Canyon . No archaeological inventories have previously been made within this parcel. No archaeological sites have been recorded. Some sites should be present but the density is likely low. It is likely there are areas for development of a well pad without affecting a historic property.

As per WO IM 2005-003 the following stipulation should be applied to each parcel: "This lease may be found to contain historic properties and/or resources protected under the National Historic Preservation

Act (NHPA), American Indian Religious Freedom Act, Native American Graves Protection and Repatriation Act, E.O. 13007, or other statutes and executive orders. The BLM will not approve any ground disturbing activities that may affect any such properties or resources until it completes its obligations under applicable requirements of the NHPA and other authorities. The BLM may require modification to exploration or development proposals to protect such properties, or disapprove any activity that is likely to result in adverse effects that cannot be successfully avoided, minimized or mitigated.”

The area of potential effect for this undertaking is generally the entire lease parcel as defined in Appendix 1.

The information on previous archaeological inventories and recorded sites comes from the archaeological site files located at the BLM Field Office in Price, Utah. Many of the previous inventories are over twenty years old and were made at a different standard than today. Sites are expected to exist that have not been recorded. The inventories surrounding these parcels are sufficient to determine that historic properties are likely to be present on the proposed lease parcel.

This evaluation is based on the assumption, supported by topography, perceived site density, existing access possibilities and previous inventories in the areas of the parcels, there should be a place on each lease parcel that one five acre well pad could be developed without directly affecting a significant cultural resource.

It is submitted that this oil and gas lease undertaking falls under the purview of the Protocol negotiated between BLM and the Utah State Historic Preservation Office, a document designed to assist BLM in meeting its responsibilities under the National Historic Preservation Act, various implementing regulations, and the National Cultural Programmatic Agreement. Further, the view taken here is that the undertaking does not exceed any of the review thresholds listed in Part VII (A) of the Protocol, and that it may be viewed as a No Historic Properties Affected; eligible sites present, but not affected as defined by 36CFR800.4 [VII (A) C (4)].

Re: December 2008 Oil and Gas Competitive Lease Sale

Dear **Chairman Nuvamsa**:

The Utah State Office of the Bureau of Land Management proposes to offer 53 lease sale parcels for the December 2008 oil and gas competitive lease sale within the Price Field Office (PFO) jurisdiction. These 53 lease parcels comprise approximately 87,000 acres, are located in Carbon and Emery Counties, Utah, and are illustrated on the attached map. Additionally, full legal descriptions for these parcels are presented in the attached Parcel List.

Leasing is an undertaking that requires consultation by the National Historic Preservation Act (NHPA). Leasing of this oil and gas parcel could impact sites listed on or eligible for the National Register of Historic Places in that leasing gives a right to the lessee to develop at least some place on the lease. These impacts would take place only if and when the lease is developed. The nature and locations of the impacts can only be identified if and when a proposal for development is made.

The BLM invites your comments regarding the cultural, environmental, or any other issues pertinent to the leasing of these parcels which may be of concern to your community. If you would like further information or wish to discuss the project further, please contact Don Stephens at (435) 636-3608. We would very much appreciate receiving your comments or questions; however, we will conclude that you have no concerns if we receive no response from you within 30 days of receipt of this letter.

Sincerely,

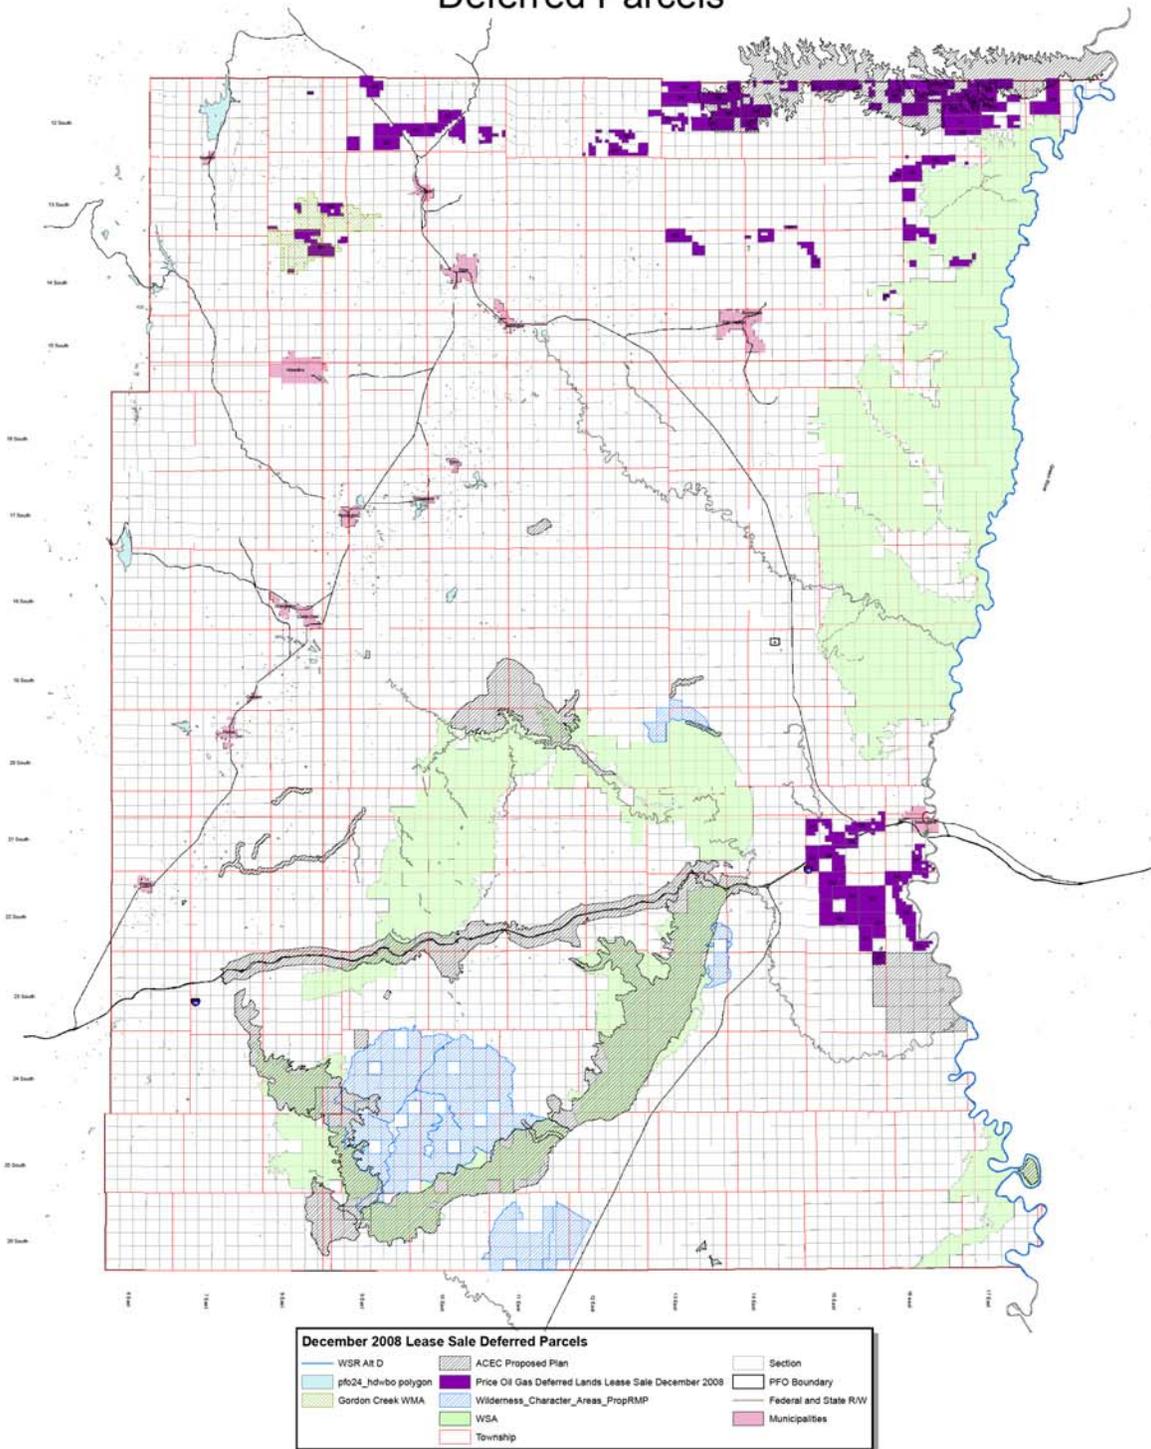

Michael Stiewig  
Field Manager

Dear Chairman Frost:

The Utah State Office of the Bureau of Land Management proposes to offer 53 lease sale parcels for the December 2008 oil and gas competitive lease sale within the Price Field Office (PFO) jurisdiction. These 53 lease parcels comprise approximately 87,000 acres, are located in Carbon and Emery Counties, Utah, and are illustrated on the attached map. Additionally, full legal descriptions for these parcels are presented in the attached Parcel List.

Leasing is an undertaking that requires consultation by the National Historic Preservation Act (NHPA). Leasing of this oil and gas parcel could impact sites listed on or eligible for the National Register of Historic Places in that leasing gives a right to the lessee to develop at least some place on the lease. These impacts would take place only if and when the lease is developed. The nature and locations of the impacts can only be identified if and when a proposal for development is made.

The BLM invites your comments regarding the cultural, environmental, or any other issues pertinent to the leasing of these parcels which may be of concern to your community. If you would like further information or wish to discuss the project further, please contact Don Stephens at (435) 636-3608. We would very much appreciate receiving your comments or

questions; however, we will conclude that you have no concerns if we receive no response from you within 30 days of receipt of this letter.

Sincerely,

Michael Stiewig  
Acting Field Manager

# THE NAVAJO NATION

JOE SHRILEY, JR.  
PRESIDENT

BEN SHELLY  
VICE-PRESIDENT

October 29, 2008

Michael Stiewig, Acting Field Manager  
Price Field Office  
125 South 600 West  
Price, Utah 84501

Dear Mr. Stiewig:

On October 29, 2008, the Navajo Nation Historic Preservation Department – Traditional Culture Program (NNHPD-TCP) is in receipt of the proposed oil and gas competitive lease sale within the Price Field Office (PFO) jurisdiction.

After reviewing your consultation documents, HPD-TCP has concluded the proposed undertaking/project area will not impact any Navajo traditional cultural properties. The HPD-TCP, on behalf of the Navajo Nation, has no concerns at this time.

However, that determination made by HPD-TCP does not necessarily mean that the Navajo Nation has no interest or concerns with the proposed project. If the proposed project inadvertently discovers habitation sites, plant gathering areas, human remains and objects of cultural patrimony the HPD-TCP request that we be notified respectively in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA).

The HPD-TCP appreciates the Bureau of Land Management's consultation efforts, pursuant to 36 CFR Pt. 800.1 (c)(2)(iii). Should you have any additional concerns and/or questions, do not hesitate to contact me electronically at [kafrancis@navajo.org](mailto:kafrancis@navajo.org) or telephone at 928-871-6490.

Sincerely

Kelly A. Francis, Navajo Culture Specialist (Section 106 Consultations)  
Historic Preservation Department – Traditional Culture Program
