Cara McMillan – Forest Service Work on the Dolores Public Lands

Working on development of some early seral species. Not found in your common books and USDA web sites.

- We are practitioners so we can't report on our findings with the scientific precision that many of you are using.
- In general numbers we have about a 30% success? rate. (Now understand success for us is totally undefined. Is growing plant success? YES!

FIRECRACKER PENSTEMON
