One of the Nation's Preeminent Fossil Quarries Celebrates National Fossil Day

EMERY COUNTY, Utah, September 30, 2010—Cleveland-Lloyd Dinosaur Quarry Celebrates National Fossil Day on October 13th with FREE admission and more.

Where better to celebrate National Fossil Day than at one of the Nation's most superb fossil quarries?

In celebration of National Fossil Day on Wednesday, October 13, the Cleveland-Lloyd Dinosaur Quarry will be open to the public free of charge. The first 200 visitors will receive a commemorative pin which celebrates fossils on America's Public Lands. Celebrating this day with free admission and commemorative pins is just one way the Cleveland-Lloyd Dinosaur Quarry can give back to the public who have supported the quarry through the years and assisted in its success.

The Cleveland-Lloyd Dinosaur Quarry is one of the Nation's premier fossil quarries. It has been open to visitation by the public for over 40 years. Dedicated in 1968, the museum and quarry was the Bureau of Land Management's first visitor center.

From now until October 31, the Quarry will be open on Friday and Saturday from 10 a.m. to 5 p.m. and on Sunday from noon to 5 p.m.

For directions to the Cleveland-Lloyd Dinosaur Quarry visit the website at

Or stop by the Museum of the San Rafael at 96 North 100 East - Castle Dale, Utah
Or the USU/CEU Prehistoric Museum at 155 East Main Street – Price, Utah

- BLM -

The BLM manages more land – 245 million acres – than any other Federal agency. This land, known as the National System of Public Lands, is primarily located in 12 Western states, including Alaska. The Bureau, with a budget of about \$1 billion, also administers 700 million acres of sub-surface mineral estate throughout the nation. The BLM's multiple-use mission is to sustain the health and productivity of the public lands for the use and enjoyment of present and future generations. The Bureau accomplishes this by managing such activities as outdoor recreation, livestock grazing, mineral development, and energy production, and by conserving natural, historical, cultural, and other resources on public lands.
