**RATIONALE / JUSTIFICATION**

- **[Item 2011-01-001]** – The language is corrected to be consistent with Management Decision MIN-1 of the Vernal ROD.
- **[Item 2011-01-002]** – The VRM Class II language is added to be consistent with Management Decision WC-2 of the Vernal ROD. The Vernal ROD also states:

A controlled surface use stipulation in the Approved RMP is applied to areas managed with VRM Class II objectives to protect these sensitive viewsheds. (See page 31.)

As a result, the CSU stipulation is added and applies to all BLM Natural areas except for the White River area.

- **[Item 2011-01-003]** – VRM is organized by class and not by category. As stated on page 31 of the Vernal ROD, all VRM Class II areas are to be managed as CSU.

These clarifications do not change the any management decisions or the intent of the stipulations.
