

**SHARE THE ADVENTURE! BLM ELECTRONIC FIELD TRIPS**

# Fire's Role in Ecosystems: A Hot Topic!

Bureau of Land Management

Beginning October 31, 2005, join BLM for an Electronic Field Trip to explore *Fire's Role in Ecosystems: A Hot Topic!*

Produced in conjunction with Distance Learning Integrators and the National Interagency Fire Center, this web-based program features three segments:

- A "virtual visit" focusing on the role of wildland fire in ecosystems;
- An "Ask the Experts" segment in which BLM fire specialists answer student questions online; and
- A student journal, which allows educators to assess student learning.

The fieldtrip will be available for viewing beginning October 31, 2005, through the remainder of the school year. For more information, see [www.eFieldTrips.org](http://www.eFieldTrips.org).

Visit our website to find out more about how teachers and students can participate in this exciting project. Classes should register in advance to participate in the complete program.
