Note: \*Mileage accuracy varies. BLM has management responsibility along 12 of 23 National Trails, which includes over 85% of all of the federal miles along all National Historic Trails. Overall trail "administration" responsibility is assigned to an agency by the Secretary of the Interior or Secretary of Agriculture. The Iditarod is administered by the BLM. El Camino Real de Tierra Adentro is jointly administered by the BLM and NPS. The U.S. Forest Service administers the Pacific Crest and Continental Divide trails and the remainder of the trails involving BLM public lands are administered by the NPS. On-the-ground trail "management" responsibility remains with the respective land-managing agency. National Recreational Trails (NRTs) designated by the Secretary of the Interior are not listed or included within this table.
