2/4/06

Brian Amme, Project Manager  
Bureau of Land Management  
POB 12000  
Reno, Nev., 89520-0006

Dear Mr. Amme,

1 On behalf of the Wyoming State Grazing Board, I am submitting comments on the Proposed Vegetation Treatments on BLM Lands in the 17 Western States EIS.

2 We would like to express our support for Alternative B, which allows the BLM to include herbicide use as a management tool to reduce the risk of catastrophic wild fires and restore healthy forest and rangelands and treat noxious weeds. These herbicides must remain a tool to reduce hazardous fuels and unwanted vegetation.

3 We would also like to incorporate, by reference, support for the comments submitted by the National Public Lands Council, the Wyoming Department of Agriculture, and the Association of Range Consultants.

Thank you for considering these comments.

Niels Hansen, Chairman of the WSGB Central Committee
