Subject
use of herbicides on public lands.

Subject: Comment on BLM Programmatic EIS for Herbicide Vegetation
Treatments
in 17 Western States

Brian Amme, Project Manager
BLM, P.O. Box 12000
Reno, NV 89520-0006

Mr. Brian Amme,

1 I have spent the past 22 years recovering my immune system from the "harmless" spraying of chemicals in Alameda County, California.

I am a certificated Holistic Nutrition Educator and current research is growing in identifying chemicals as a foundational cause of chronic human health conditions.

2 How can you begin to even think that herbicide spraying has value in the bigger environmental picture. Chemicals are unbalancing the health of this planet and the life forms that live here.

I urge that you consider safer, alternative means of vegetation control, that enhance environmental health, and not destroy it.

Sincerely,

Marcela Ries
