

Brian Amme
Project Manager, BLM
P.O. Box 12000
Reno, NV 89520-0006

Dear Mr. Amme and BLM

The MSU/Powell Co. Extension office would like to go on record of supporting the PEIS and the PER proposals that have been drafted. Several of my producers also support this measure. We feel it is important to work cooperatively with private, state, and federal owned lands especially in the area of noxious weed management. Montana has several BLM owned lands and proper control, protection and management is very important. We fully support the use of herbicide use and the use of new herbicides in the future. We also support the use of fire, mechanical, manual and biological control on BLM lands. Not only is it improving and protecting these lands but it is also protecting our neighbors from disastrous fires, etc.

3

On behalf of myself and several of my producers in Powell County we support this draft proposal by the BLM.

**Powell County
Extension Office**

Sincerely,

Jodi Pauley
MSU/Powell Co. Extension Agent
