Vegetation Treatments Using
Herbicides Programmatic EIS

To: Brian Amme

I writing you in opposition of the Vegetation Treatments Using Herbicides Programmatic EIS. This is definitely not an effective way to deal with the invasive plant problem that the BLM is dealing with. You must get to the root causes of the problem. Those causes are livestock grazing, road construction and use, use of off-road vehicles, timber harvests, and fuel reduction projects which all encourage invasive weeds on BLM land. The BLM needs to change the way the agency manages these activities in order to prevent invasive plant problems.
