fr doc 05 22343  
wo 220-05 - 1020-ja - veis  
spraying toxic herbicides on forests (vegetation  
treatments)!!!!!!!

the fact of the matter is that spraying toxic  
herbicides/pesticides in our forests is an  
anti-environmental action, killing and injuring  
people, birds, animals.

1

Spray drifts. It can drift thousands of miles.  
Spraying out west comes east.

2

We should NOT be spraying any toxic chemicals in our  
forests. It is time to stop polluting our air/water  
and soil with the application of these toxic  
chemicals.

3

The effect on animals and birds, as well as people, is  
enormously costly in terms of medical treatment,  
injury and death.
