Subject

nopestorherbicide

To whom it may concern

1 I do not approve or support the use of Pesticides or herbicides on our public lands. It may seem as though you may be solving some problem by using them, but in the end you will only create another problem as the ecosystem acts as a whole and will respond as such.

2 These public lands are our commons, I choose not to eat food that have been poisoned by these chemicals and I do not want to walk or have my children walk through our public lands after they are sprayed with these chemicals.

3 I do hope you will respect my view and desire for a healthy ecosystem that will if left alone, heal itself.

Thank you

Shirley Pevanik
